2003 and Subsequent Year Crops Reported on FSA-578

The following lists the crop names, crop codes, abbreviations, intended uses, and land uses for crops and commodities reported on FSA-578.

Notes: Except for sorghum, crops historically reported with intended uses of “Silage” (SG), “Haying” (HY), “Green Chop” (GC), or “Haylage” (HG) shall now be reported with an intended use of “FG”.

Hybrid seed shall be reported as the intended use of “Seed” (SD) associated to the applicable crop.

In SAP/CRM, crop and type combinations will be represented as a single “product”.

Example: Apple, Common and Apple, Specialty are 2 different products found within Product Master. Also, the FSA crop and type codes will be included in Product Master as “CVS crop and type”, such as “0054-COM” and “0054-SPC”.

Note: For 2017 and subsequent years, the “cover only” (CO) intended use was replaced with “cover crop”.
