Reasonable Accommodation Statement:

"Persons with disabilities who require accommodations to attend or participate in any FSA programs should contact Virginia Nollmeyer, CED, PO Box 6, Forsyth, MT 59327 at 406-346-7333 or Federal Relay Service at 1-800-877-8339."

Rosebud-Treasure FSA News August 2010

CRP Sign-up Open August 2 to August 27

Competitive sign-up for the Conservation Reserve Program (CRP) opens on August 2, 2010. From that date through August 27, 2010, producers may offer eligible land for this program. USDA is authorized to maintain CRP enrollment up to 32 million acres. Enrollment is likely to exceed the acreage limit.

CRP provides conservation practices that preserve the soil, clean water, and restore wildlife habitat. Producers enrolling in CRP plant long-term, resource-conserving covers in exchange for annual rental payments, cost-share and technical assistance. Participants voluntarily remove environmentally sensitive land from agricultural production by entering into long-term contracts for 10 to 15 years.

All interested farmers and ranchers should contact the local FSA office soon to learn more about this program.

SURE Crop Disaster Program has Sept. 30 deadline

The deadline for the Supplemental Revenue Assistance Payments program (SURE) for the 2008 crop year is Sept. 30, 2010. Sign-up for the crop disaster assistance program began on Jan. 4, 2010. There are no provisions for late-filed applications.

The SURE program is an important component of the disaster portion of the 2008 Farm Bill and will provide financial assistance to producers who have suffered crop losses due to natural disasters during the 2008 crop year. Producers who suffered crop production losses during the 2008 crop year are encouraged to visit their local FSA office about eligibility requirements and submit their applications by Sept. 30.

ACRE Data Deadline Moved to Sept. 1

The deadline for 2009 production certification to comply with ACRE was extended until September 1, 2010. The extension is for completing both the farm benchmark yield (2004 through 2008) and the actual farm yield (2009). Participants in the 2009 ACRE program must certify their yields by September 1, 2010 to remain eligible for ACRE benefits.

Durum Wheat Quality Program has Sept. 15 deadline

The Farm Service Agency is currently taking applications for the Durum Wheat Quality Program (DWQP). The program will partially compensate producers for the costs associated with fungicide application on 2010 durum wheat. Under this program producers may be eligible to receive a 50 percent cost share for applying fungicides to the 2010 durum wheat crop to control Fusarium head blight, commonly known as wheat scab. Durum producers have until **Sept. 15, 2010**, to apply for fungicide application reimbursement under the DWQP program. The fungicide payment rate for the chemical will be established by National Office. The reimbursement rate for the cost of application is set by the state committee. Producers can prepare for DWQP sign-up by gathering their 2010 fungicide bills that document the Fusarium fighting efforts. For more information, producers can contact their local FSA office.

Marketing Assistance Loans

A Marketing Assistance Loan (MAL) is available for producers who share in the risk of producing the crop. To be eligible, a producer must maintain continual beneficial interest in the crop from harvest through the earlier of the date the loan is repaid or Commodity Credit Corporation (CCC) takes title to the commodity. Beneficial interest means retaining the ability to make decisions about the commodity; responsibility for loss or damage to the commodity; and title to the commodity. Once beneficial interest in a commodity is lost, the commodity is ineligible for loan — even if the producer regains beneficial interest.

Commodity loan eligibility requires compliance with conservation and wetland protection requirements; beneficial interest requirements, acreage reporting and ensuring that the commodity meets CCC minimum grade and quality standards. For commodities to be eligible they must have been produced by an eligible producer, be in existence and in a storable condition and be merchantable for food, feed or other uses as determined by CCC. The quality of the commodity in farm storage must be maintained throughout the term of the loan.

Producers do not have to participate in the Direct and Counter-Cyclical and/or ACRE Programs to be eligible for commodity loans.

Violating provisions of a marketing assistance loan may trigger procedures, such as assessing liquidated damages, calling the loan and denial of future commodity loans.

The most common violations are removing or disposing of a commodity being used as loan collateral without prior authorization and providing an incorrect quantity certification.

Wetland Compliance

Producers renting or purchasing land that may have a converted wetland status need to check with the county office to learn if there are restrictions.

Farm Bill regulations provide that, unless exempt, persons are ineligible for benefits under certain programs administered by USDA if they:

- plant an agricultural commodity on wetland that was converted after December 23, 1985
- convert a wetland after November 28, 1990

FSA may not approve any loan or loan guarantee to drain, dredge, fill, level or otherwise manipulate a wetland, or to engage in any activity that results in impairing or reducing the flow, circulation or reach of water except in the case of activity related to the maintenance of previously converted wetlands.

The following provides permitted uses and restrictions within Wetland compliance provisions:

- wetlands can be farmed under natural conditions, but not converted
- wetlands converted before November 28, 1990, cannot be planted to an agricultural commodity and retain eligibility for benefits
- wetlands converted after Nov. 28, 1990, must either be restored to wetland status or mitigated to regain eligibility for program benefits.
- wetlands that can be farmed under natural conditions cannot be manipulated in any way, unless the Natural Resources Conservation Service determines the work would have a minimal effect on the wetland values
- wetlands converted before December 23, 1985, can be farmed and maintained

Additional information about wetlands is available at the USDA Service Center.

CRP Managed Hay and Grazing Began July 16

2010 Managed Grazing Period ends Sept. 13; 2010 Managed Haying ends Sept. 30

The 2010 Conservation Reserve Program (CRP) managed haying and grazing start date is July 16, 2010, for all participants who have acres that are eligible to be hayed or grazed this year. Managed haying and grazing cannot begin until an application is completed at the local FSA County Office and written approval is received from the FSA County Committee or its designee.

CRP participants with conservation plans that included the managed haying and grazing provisions that applied after the National Wildlife Federation (NWF) Settlement Agreement in 2006, are limited to grazing 1 in 5 years and haying 1 in 10 years. Haying or grazing was not allowed until August 2. CRP participants with the NWF rules will have the opportunity to modify their contracts to switch to the old Montana Rules, which allow managed grazing 1 in 3 years and managed haying 1 in 5 years. Under the Montana rules, haying and grazing could begin July 16th. All CRP contract participants must sign the conservation plan modification and receive written approval from the FSA County Office before any haying or grazing can begin.

To determine if acres are eligible to be hayed or grazed the county office will determine when the acres were last hayed or grazed. Grazing can only occur 1 in 3 years on the same acres. Haying can only occur 1 in 5 years on the same acres. The 50% that has to be set aside for wildlife may be hayed the following year. The 2010 Managed Grazing Period is limited to 60 days - July 16th through September 13th. The Managed Haying Period is July 16th through September 30th. Participants who want to modify their conservation plans should contact their local county FSA office.

CREP & Continuous CRP

The Conservation Reserve Enhancement Program (CREP) is a program to decrease erosion, restore wildlife habitat and safeguard ground and surface water. CREP is a partnership with federal and state government and for specific geographic areas.

Environmentally sensitive acreage qualifying for CREP or Continuous CRP will be eligible for annual rental payments and cost-share of up to 50 percent on approved practices. These programs will remain funded, and continue to provide heightened environmental benefits.

Transition Incentives

The Transition Incentives Program (TIP) encourages retired or retiring owners or operators to transition their Conservation Reserve Program (CRP) acres to beginning or socially disadvantaged farmers or ranchers. TIP sign-up opened May 17, 2010. If all program requirements are met, TIP provides annual rental payments to the retiring farmer for up to two additional years after the expiration of the CRP contract, provided the transition is not to a family member. For eligibility requirements producers should visit the FSA county office or www.fsa.usda.gov.

Grasshopper Loss:

If you have suffered a loss due to grasshoppers please be sure to notify your local FSA office. Although we currently do not have a 2010 program to cover loss due to grasshoppers, a notice of loss should still be timely and filed. Report your grasshopper loss within 15 days after the disaster occurrence, or date of loss or damage to the crop becomes apparent.

Actively Engaged

FSA wants to remind producers about the rules that govern the requirements to be 'actively engaged' in farming. These rules apply to eligibility for payments under the Direct and Counter-cyclical Program (DCP) or Average Crop Revenue Election (ACRE) program administered by FSA.

Normally the stockholder or a member of a legal entity **must make contributions of active personal labor and/or active personal management for the farming operation.** The contributions are to be performed on regular basis, must be identifiable, and separate from the contributions of others.

The exception to this rule for a stockholder or member of a legal entity only occurs if both of the following apply:

- At least half of the interest in the legal entity is held by stockholders or members who are providing active personal labor or active personal management; and

The total direct payments received, both directly and indirectly, by the legal

- entity and each of the members doesn't exceed \$40,000.

Loans for the Socially Disadvantaged

FSA has a number of loan programs available to assist applicants to begin or continue in agriculture production. Loans are available for operating type loans and/or purchase or improve farms or ranches.

While all qualified producers are eligible to apply for these loan programs, the FSA has provided priority funding for members of Socially Disadvantaged Applicants.

A socially disadvantaged applicant is one of a group whose members have been subjected to racial, ethnic or gender prejudice because of his or her identity as members of the group without regard to his or her individual qualities.

For purposes of this program, socially disadvantaged groups are women, African Americans, American Indians, Alaskan Natives, Hispanics, Asian Americans, and Pacific Islanders.

If producers or their spouses believe they would qualify as socially disadvantaged, they should contact their local FSA office for details. FSA loans are only available to applicants who meet all the eligibility requirements and are unable to obtain the needed credit elsewhere.

Information on programs administered by FSA in MT and individual county office newsletters are available at:

www.fsa.usda.gov/mt.

Dates to Remember:

- August 1** – Farm Reconstitution Request Deadline
- August 2** – Last Day for FSA to Accept COC Election Nominations
- August 2** - CRP Sign-Up Open
- August 27** - Last Day of CRP Sign-Up
- Sept. 1** – Deadline to report production for ACRE
- Sept. 1** - NAP Application Sales Deadline for Value Loss Crops (2011 Crop Year)
- Sept. 13** - Managed Grazing Period Ends
- Sept. 15** - Durum Wheat Quality Program Application Deadline
- Sept. 30** - Managed Haying Period Ends
- Sept. 30** - NAP Acreage Reporting Deadline for Value Loss Crops
- Sept. 30** - RMA deadline to purchase Forage Production Policy (2011 Crop Year)
- Sept. 30** - SURE Application Deadline for 2008 Crop Year
- October 2010** – 2010 DCP and ACRE direct payments issued. 2009 additional ACRE payments, if applicable, will also be issued at that time.

Electronic Services

If a producer has Internet access, program participants can access many services from home 24 hours a day, seven days a week, and receive approval and payment by direct deposit within 48 hours.

To participate in these services, you must meet all program eligibility requirements. Online services have stringent security measures to protect your private information.

To utilize electronic services requires a *USDA eAuthentication Level 2 Account*, including your e-mail on an online registration form at www.eauth.egov.usda.gov/index.html followed by a visit to the county office for identity verification.

If you have questions, or would like assistance establishing your account, just contact your local USDA Service Center and talk with our trained FSA personnel.
