Rights Coordinator

2013 County Committee Elections

The election of agricultural producers to the Farm Service Agency (FSA) county committees is important to all farmers and ranchers. It is crucial that every eligible producer participate in these elections because FSA county committees are a link between the agricultural community and the U.S. Department of Agriculture.

County Committee (COC) members are a critical component of FSA operations. The intent is to have the COC reflect the makeup of the producers and represent all constituents. This means that minorities, women or lower income producers need to be on the committee to speak for underrepresented groups.

County Committee election ballots will be mailed to eligible voters on Nov. 4, 2013. The last day to return completed ballots to the USDA Service Center is Dec. 2, 2013.

Emergency Farm Loans

USDA's Farm Service Agency (FSA) provides emergency loans to help producers recover from production and physical losses due to drought, flooding, other natural disasters, or quarantine.

Loan Uses

Emergency loan funds may be used to:

- Restore or replace essential property;
- Pay all or part of production costs associated with the disaster year;
- Pay essential family living expenses;
- Reorganize the farming operation; and
- Refinance certain debts.

Further information and applications for the loan programs described are available at local FSA county offices.

NAP Loss Filing

The CCC-576, Notice of Loss, is used to report failed acreage and prevented planting and may be completed by any producer with an interest in the crop. Timely filing a Notice of Loss is required for all crops including grasses. For losses on crops covered by the Non-insured Crop Disaster Assistance Program (NAP) and crop insurance, you must file a CCC-576 (Notice of Loss) in the FSA County Office within 15 days of the occurrence of the disaster or when losses become apparent.

If filing for prevented planting, an acreage report and CCC-576 must be filed within 15 calendar days of the final planting date for the crop.

Disaster Assistance

The Farm Service Agency would like to remind crop and livestock producers that have recently experienced severe damage from flooding, wildfires and tornadoes that FSA programs exist to aid producers.

We encourage all who have suffered a disaster due to the recent severe weather conditions to read the fact sheets and visit their local FSA county office so they get a quick start in the recovery process.

Fact sheets for all of these programs can be found at the disaster assistance program page <http://www.fsa.usda.gov/FSA/webapp?area=home&subject=diap&topic=landing>.

Youth Loans

The Farm Service Agency makes loans to rural youths to establish and operate income-producing projects in connection with 4-H Clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce

sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is \$5000.

For more information you can stop by your FSA county office. Our staff can help with preparing and processing the application forms.

Farm Safety

Flowing grain in a storage bin or gravity-flow wagon is like quicksand, it can kill quickly. It takes less than five seconds for a person caught in flowing grain to be trapped.

The mechanical aspects of grain handling equipment, also presents a real danger. Augers, power take offs, and other moving parts can grab people or clothing.

These hazards, along with pinch points and missing shields, are dangerous enough for adults; not to mention children. It is always advisable to keep children a safe distance from operating farm equipment. Always use extra caution when backing or maneuvering farm machinery. Ensure everyone is visibly clear and accounted for before machinery is engaged.

FSA wants all farmers to have a productive crop year, and that begins with putting safety first.

Succession in Interest

If you have made any changes that affect your interest in base acres since you signed your last Direct and Counter-cyclical Program contract, you must report these *successions-in-interest* to the county committee by Sept. 30, so that a final determination can be made on who is eligible for the program on the farm.

Changes that qualify as a succession-in-interest include:

- A sale of land
- A change of operator or producer, including an increase or decrease in the number of partners
- A foreclosure, bankruptcy or involuntary loss of the farm.
- A change in producer shares to reflect changes in the producer's share of the crop(s) that were originally approved on the contract.

If a succession-in-interest has taken place, you, as the "predecessor," are required to refund any advance DCP payments you received for the affected base acres before a payment can be made to the "successor."

Not reporting a succession-in-interest can result in contract termination and a loss of program benefits for all producers involved.

Farm Storage Facility Loans

The Farm Storage Facility Loan Program (FSFLP) allows producers of eligible commodities to obtain low-interest financing to build or upgrade farm storage and handling facilities.

The new maximum principal amount of a loan through FSFL is \$500,000. Participants are now required to provide a down payment of 15 percent, with CCC providing a loan for the remaining 85 percent of the net cost of the eligible storage facility and permanent drying and handling equipment. New loan terms of 7, 10 or 12 years are available depending on the amount of the loan. Interest rates for each term rate may be different and are based on the rate which CCC borrows from the Treasury Department.

Payments are available in the form of a partial disbursement and the remaining final disbursement. The partial disbursement will be available after a portion of the construction has been completed. The final fund disbursement will be made when all construction is completed. The maximum amount of the partial disbursement will be 50 percent of the projected and approved total loan amount.

Applications for FSFL must be submitted to the FSA county office that maintains the farm's records. An FSFL must be approved before any site preparation or construction can begin.

For more information about FSFL contact the local FSA county office or www.fsa.usda.gov.

Guaranteed Loan Program

The Farm Service Agency loan limit for the Guaranteed Loan Program has increased to \$1,302,000. The limit is adjusted annually based on data compiled by the National Agricultural Statistics Service.

The lending limit increases every year according to an inflation index. The maximum combined guaranteed and direct farm loan indebtedness has increased to \$1,602,000.

As a reminder, the one-time loan origination fee charged on FSA guaranteed farm ownership and operating loans is 1.5 percent of the guaranteed portion of the loan.

Producers should contact the local FSA Office with questions about farm loans.

Marketing Assistance Loans

A Marketing Assistance Loan (MAL) is available for producers who share in the risk of producing the crop. To be eligible, a producer must maintain continual beneficial interest in the crop from harvest through the earlier of the date the loan is repaid or CCC takes title to the commodity. Beneficial interest means retaining the ability to make decisions about the commodity; responsibility for loss or damage to the commodity; and title to the commodity. Once beneficial interest in a commodity is lost, the commodity is ineligible for loan — even if the producer regains beneficial interest.

Commodity loan eligibility also requires compliance with conservation and wetland protection requirements; beneficial interest requirements, acreage reporting and ensuring that the commodity meets Commodity Credit Corporation minimum grade and quality standards. For commodities to be eligible they must have been produced by an eligible producer, be in existence and in a storable condition and be merchantable for food, feed or other uses as determined by CCC. The quality of the commodity in farm storage must be maintained throughout the term of the loan.

Producers do not have to participate in the Direct and Counter-Cyclical and/or ACRE programs to be eligible for commodity loans.

Violating provisions of a marketing assistance loan may trigger administrative actions, such as assessing liquidated damages, calling the loan and denial of future farm-stored loans.

The most common violations are removing or disposing of a commodity being used as loan collateral without prior authorization and providing an incorrect quantity certification.

CREP & Continuous CRP Available

The Conservation Reserve Enhancement Program (CREP) allows farmers and ranchers to voluntarily enroll environmentally sensitive land into a program that decreases erosion, restores wildlife habitat and safeguards ground and surface water. CREP is a partnership with federal and state government and is limited to specific geographic areas.

Environmentally sensitive acreage qualifying for the Conservation Reserve Enhancement Program (CREP) or Continuous CRP will be eligible for annual rental payments and cost-share of up to 50 percent on approved practices. These programs will remain funded, and

continue to provide heightened environmental benefits on select areas.

Loans for the Socially Disadvantaged

FSA has a number of loan programs available to assist applicants to begin or continue in agriculture production. Farm operating loans are available as well as loans to purchase or improve farms or ranches.

While all qualified producers are eligible to apply for these loan programs, the FSA has provided priority funding for members of socially disadvantaged applicants.

A socially disadvantaged applicant is one of a group whose members have been subjected to racial, ethnic or gender prejudice because of his or her identity as members of the group without regard to his or her individual qualities.

For purposes of this program, socially disadvantaged groups are women, African-Americans, American Indians, Alaskan Natives, Hispanics, Asian-Americans and Pacific Islanders.

FSA loans are available to applicants who meet all the eligibility requirements and are unable to obtain the needed credit elsewhere.

Preventing Fraud

FSA supports the Risk Management Agency in the prevention of fraud, waste and abuse of the Federal Crop Insurance Program. FSA continues to assist RMA and insurance providers by monitoring crop conditions throughout the growing season. FSA will refer all suspected cases of fraud, waste and abuse directly to RMA. Producers can report suspected cases to the FSA office, RMA, or the Office of the Inspector General.

AFIDA

Any foreign person who acquires, transfers or holds any interest, other than a security interest, in agricultural land in the United States is required by law to report the transaction no later than 90 days after the date of the transaction. They must file Agricultural Foreign Investment Disclosure Act (AFIDA) reports with the FSA county office that maintains reports for the county where the land is located.

For AFIDA purposes, agricultural land is defined as any land used for farming, ranching or timber production, if the tracts total 10 acres or more. Contact FSA for more information.

Please be advised that dates for FSA programs are often county-specific. Please contact your local FSA office for detailed information pertaining to your operation.

. Land Contract (LC) Guarantees

The Land Contract (LC) Guarantee Program is a valuable tool to transfer farm real estate to the next generation of farmers and ranchers. Guarantees will be offered to the owner of a farm who wishes to sell real estate through a land contract to a beginning or socially disadvantaged farmer or rancher. The guarantee reduces the financial risk to the seller.

FSA offers two types of guarantees:

- Prompt Payment Guarantee - A guarantee up to the amount of three amortized annual installments plus the cost of any related real estate taxes and insurance.
- Standard Guarantee - A guarantee of 90 percent of the outstanding principal balance under the land contract.

The guarantee period is 10 years and the contract payments must be amortized for a minimum of 20 years. The purchase price of the farm cannot exceed the lesser of \$500,000 or the market value of the property.

For additional information you can read the [Land Contract Guarantee Program Fact Sheet](#).

Selected Interest Rates for September 2013	
90-Day Treasury Bill	.125%
Farm Operating Loans- Direct	1.875%
Farm Ownership Loans - Direct	4.000%
