## COC Election Nominations

The election of agricultural producers to Farm Service Agency (FSA) county committee starts with the nomination of eligible candidates.

To become a nominee, eligible individuals must sign nomination form FSA-669A. The form includes a statement that the nominee agrees to serve if elected. This form is available at USDA Service Centers and online at: [http://www.fsa.usda.gov/Internet/FSA\\_File/fsa0669a\\_commiteelectform.pdf](http://www.fsa.usda.gov/Internet/FSA_File/fsa0669a_commiteelectform.pdf), or, on page 3 of this newsletter.

Nomination forms for the 2011 election must be postmarked or received in the local USDA Service Center by close of business on Aug. 1, 2011.

Agricultural producers who participate or cooperate in an FSA program may be nominated for candidacy for the county committee. Individuals may nominate themselves or others as a candidate. Additionally, organizations representing minority and women farmers or ranchers may nominate candidates. Nomination forms are filed for the county committee of the office that administers a producer's farm records.

LAA#1 is up for election this year. Evanston, Hillard, Almy, Bear River, a portion of the Piedmont and the Yellow Creek areas comprise LAA#1.

Ellis Lyle Robinson currently represents this area.

## Disaster Assistance

(If you are experiencing flooding damage please contact the FSA office promptly so that documentation may be collected for any potential applications. Funding does have to be requested from the National Office.)

The Farm Service Agency would like to remind crop and livestock producers that have or are experiencing severe losses that FSA programs are available to assist with recovery.

FSA administers several important programs that help producers recover from disaster damage and livestock deaths. Among the key programs available to address impacts from disasters are the following:

- **Emergency Conservation Program (ECP), (Irrigation Structures, etc.)**
- **Livestock Indemnity Program (LIP) (Livestock Death Loss),**
- **Emergency Assistance for Livestock, and Honey Bee Program (ELAP),**
- **Noninsured Disaster Assistance Program (NAP) (Hay and Grazing loss) and the**
- **Supplemental Revenue Assistance Payments (SURE) Program**

Fact sheets for all of these programs can be found at [www.fsa.usda.gov](http://www.fsa.usda.gov); click on Newsroom, then Fact Sheets.

We encourage all who have suffered a disaster due to the recent severe weather conditions to read the fact sheets and visit the local FSA county office so they get a quick start in the recovery process.

## Crop Reporting

The annual requirement of reporting to the FSA office can be referred to as crop reporting, acreage reporting, or crop certification. Filing an accurate and timely report for all crops and land uses, including failed acreage, can prevent loss of benefits for a variety of Farm Service Agency programs. All cropland on the farm must be reported to receive benefits from the Direct and Counter-cyclical Program, marketing assistance loans and Loan Deficiency Payments for wool.

The certification form FSA-578, Report of Acreage, must account for all cropland on a farm, whether idle or planted. The producer certification deadline for all crops is July 01, 2011.

### CRP & NAP Certification

Conservation Reserve Program acreage must be reported to receive annual rental payments. And, crop acreage for Non-insured Crop Disaster Assistance Program (NAP) must also be reported.

### Payment Limitations

Anyone that plans to participate in 2011 programs is required to submit a completed CCC-902, CCC-926, and CCC-901, if applicable, for payment eligibility and payment limitation purposes.

### Contributions

All partners, stockholders, or members with an ownership interest in the legal entity must make a contribution, whether compensated or **not** compensated, for active--\*  

- personal labor,
- active personal management,
- or a combination of active personal labor and active personal management to the farming operation;

\*Note: there are exceptions for spouses.

Additional information on payment limitations is available at FSA county offices or on line at:

[www.fsa.usda.gov](http://www.fsa.usda.gov)

### Farm Reconstitutions

For FSA program purposes, tracts having the same owner and the same operator are grouped under one farm serial number. When changes in ownership or operation take place, a farm reconstitution is necessary.

The reconstitution—or recon—is the process of combining or dividing farms or tracts of land based on the farming operation. Remember, to be effective for the current year, recons must be requested by **Aug. 1** for farms enrolled in specific programs.

The following are the different methods used when doing a farm recon:

**Estate Method** — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

**Designation of Landowner Method** — may be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

**DCP Cropland Method** — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

**Default Method** — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

### Sodbusting

Farmers and ranchers should be aware that if they use highly erodible land for crop production without proper conservation measures, they risk losing eligibility to participate in Farm Service Agency programs.

Before producers clear, plow or otherwise prepare areas not presently under crop production for planting, they

are required to file an AD-1026, indicating the area to be brought into production.

If Natural Resources Conservation Service indicates that the area will be highly erodible land, the producer will be required to develop and implement a conservation plan on the affected acreage, before bringing land into production.

### GIS

As part of a program to digitally map the county's farms and fields, the United States Department of Agriculture (USDA) has established the Common Land Unit (CLU) as a standardized GIS (Geographic Information Systems) data layer.

Using GIS provides for more consistent and more accurate land measurements, such as field acreage and acreage boundaries of conservation practices, such as riparian buffers. With high quality digital imagery, new land use changes (farm transfers and land subdivisions) can be easily updated. Maps can be created in either paper or digital format for FSA customers or the public.

More information about the Common Land Unit and NAIP imagery can be found by visiting on-line, APFO (Aerial Photography Field Office) at [www.apfo.usda.gov](http://www.apfo.usda.gov).
