UNITED STATES DEPARTMENT OF AGRICULTURE  
FARM SERVICE AGENCY

February 2011

## Conservation Reserve Enhancement Program - Missouri State

### Overview

USDA's Commodity Credit Corporation (CCC) and the state of Missouri have agreed to implement a Conservation Reserve Enhancement Program (CREP) to reduce the risk of nutrients and sediment from farms entering the streams and reservoirs that supply rural water supplies to over 375,000 people.

The goal of the Missouri CREP is to retire 40,000 acres of highly erodible and environmentally sensitive land along streams for 83 reservoirs that supply 58 public water supplies in 36 counties. The Missouri CREP provides for voluntary agreements with farmers to convert cropland to native grasses, trees, and other vegetation, in return for rental payments and other incentives.

CREP is a joint federal-state land retirement conservation program targeted to address local, state and nationally significant agricultural-related environmental concerns. This voluntary program uses financial incentives to encourage farmers and ranchers to enroll in the Conservation Reserve Program (CRP) in contracts of 10 to 15 years duration to remove land from agricultural production. CRP is the nation's largest private land conservation program and is implemented through USDA's Farm Service Agency (FSA).

### Eligible Areas

Producers can offer land in any part of the 83 small watersheds that meet the eligibility requirements identified for the Missouri CREP.

### Goals

The objectives of the Missouri CREP include:

- Reducing the occurrence of pesticides in all 58 drinking water supplies by 50 percent,
- Reducing the occurrence of sediment inflow into water supply reservoirs by 50 percent,
- Reducing soil erosion rates to less than 5 tons per acre,
- Helping agricultural producers meet nutrient reduction goals,
- Providing wildlife habitat enhancement for the preservation of natural diversity of the state.

### Program Cost

Generally, USDA will pay, in the aggregate, up to 75 percent of the program costs and the state of Missouri will pay the rest. USDA will pay rental and extra incentive payments to farmers for a 15-year agreement period. In addition, USDA will pay a signing bonus consistent with Handbook 2-CRP for land enrolled in the project. Almost all of the costs associated with establishing the conservation practice will be paid by USDA

or the state of Missouri. USDA and Missouri will provide technical, educational, and engineering support.

Based on the full implementation of the Missouri CREP, which projects an enrollment of 50,000 acres, the expected financial federal and state obligation will be approximately \$85 million over 15 years, with \$70 million coming from the federal government and \$15 million coming from the state. This does not include any costs that may be borne by producers. Missouri's share is approximately 20 percent of the total program costs, and the federal government's share is approximately 80 percent.

### Eligible Areas

To serve program goals better, specific CRP conservation practices have been identified for inclusion in the program. These are:

- CP2 Native Grasses,
- CP3A Hardwood Tree Planting,
- CP4D Wildlife Habitat,
- CP8A Grass Waterways
- CP15A Contour Grass Strips,
- CP21 Filter Strips,
- CP22 Riparian Buffers,
- CP23 Wetland Restoration,
- CP23A Wetland Restoration (non-floodplains)
- CP25 Rare and Declining Habitat,
- CP29 Marginal Pastureland Wildlife Habitat Buffer,

- CP30 Marginal Pastureland Wetland Buffer,
- CP31 Bottomland Timber Establishment on Wetland,
- CP33 Habitat Buffers for Upland Birds.

**Signup and Eligibility Requirements**

Eligible producers will be able to enroll in 14- to 15-year CRP contracts. Producers may extend the benefits of the program through separate contracts with the state. The applicant must be able to offer otherwise eligible acreage. The applicant also must satisfy the basic eligibility criteria for CRP.

Land must be cropland that has been cropped 4 out of the past 6 years and that is physically and legally capable of being cropped. Producers enrolling the land must generally have owned or operated the land for at least 1 year prior to enrollment. Persons who have an existing CRP contract or an approved offer with a contract pending are not eligible for CREP until that contract expires.

**Missouri CREP Payments**

Participants in the Missouri CREP are eligible for six types of payments: four from FSA as well as two from the state of Missouri. These are:

- A one-time FSA signing incentive payment of \$140 to \$150 per acre enrolled in riparian buffer practices or filter strips. This payment will be made soon after the contract has been signed,
- Cost-share assistance from

- FSA for installation of the conservation practices on the land that is retired,
- Additional cost-share assistance from the state of Missouri,
- In addition to the cost-share assistance, a one-time FSA practice incentive payment equal to about 40 percent of the total cost-share assistance,
- Annual rental payments from FSA equal to between 115 percent to 120 percent of the dryland cash rental rate for the county, and
- A one-time lump sum incentive payment from the state of Missouri equal to 150 percent of the annual rental payment.

**Enrollment in Other Programs**

Producers may enroll in the general CRP and the continuous signup CRP as well as in CREP. CREP is another option that farmers may select to enhance their land. CREP provides additional benefits not available through the general and/or continuous signup. The CREP enrollment process is on a continuous basis, and payments are at a higher effective rate.

**Haying and Grazing**

Haying and grazing would not be permitted during the CRP contract period unless USDA permits it for emergency purposes under normal CRP rules.

**For More Information**

Contact the local USDA Service Center or FSA office, the County Soil and Water Conservation

District, or the Missouri Department of Natural Resources (DNR) Soil and Water Conservation Program. Information may also be obtained from the FSA website at: [www.fsa.usda.gov](http://www.fsa.usda.gov) and the DNR website at: <http://www.dnr.mo.gov/>

*The U.S. Department of Agriculture (USDA) prohibits discrimination in all of its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, political beliefs, genetic information, reprisal, or because all of part of an individual's income is derived from any public assistance program. (Not all bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).*

*To file a complaint of discrimination, write to USDA, Assistant Secretary for Civil Rights, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, S.W., Stop 9410, Washington, DC 20250-9410, or call toll-free at (866) 632-9992 (English) or (800) 877-8339 (TDD) or (866) 377-8642 (English Federal-relay) or (800) 845-6136 (Spanish Federal-relay).
