

His for hogs. Hogs are big business in the U.S. There are about 60 million of them across the nation! We rank number three in the world in hog production. And more than $\frac{2}{3}$ of them are raised in the Corn Belt (Iowa, Illinois, Indiana, and parts of Ohio, South Dakota, Nebraska, Minnesota, Wisconsin, Michigan, Missouri and Kentucky). Texas has the largest population of wild hogs, estimated at about 3 million.
