Hours:
Monday - Friday
8:00 a.m. - 4:30 p.m.

State Committee Members:
Cletus Carter, Beaver (Chairman)
Steve Nunley, Marlow
Brenda Neufeld, Fairview
Steve Butler, Wagoner

Filing a Notice of Loss

The CCC-576, Notice of Loss, is used to report failed acreage and prevented planting and may be completed by any producer with an interest in the crop. Timely filing a Notice of Loss is required for all crops including grasses. For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), you must file a CCC-576, Notice of Loss, in the FSA County Office within 15 days of the occurrence of the disaster or when losses become apparent.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, Notice of Loss, within the required 15 calendar days.

If filing for prevented planting, an acreage report and CCC-576 must be filed within 15 calendar days of the final planting date for the crop.

Janlyn Hannah,
Public Relations/ Outreach Coordinator

Please contact your local FSA Office for questions specific to your operation or county.

Enrollment Period for 2016 USDA Safety Net Coverage Ends Aug. 1

Producers who chose coverage from the safety net programs established by the 2014 Farm Bill, known as the Agriculture Risk Coverage (ARC) or the Price Loss Coverage (PLC) programs, can visit FSA county offices through Aug. 1, 2016, to sign contracts to enroll in coverage for 2016.

Although the choice between ARC and PLC is completed and remains in effect through 2018, producers must still enroll their farm by signing a contract each year to receive coverage.

Producers are encouraged to contact their local FSA office to schedule an appointment to enroll. If a farm is not enrolled during the 2016 enrollment period, producers on that farm will not be eligible for financial assistance from the ARC or PLC programs should crop prices or farm revenues fall below the historical price or revenue benchmarks established by the program.

The two programs were authorized by the 2014 Farm Bill and offer a safety net to agricultural producers when there is a substantial drop in prices or revenues for covered commodities. Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity. For more details regarding these programs, go to www.fsa.usda.gov/arc-plc.

For more information, producers are encouraged to visit their local FSA office. To find a local FSA office, visit http://offices.usda.gov.

ARC, PLC and CTAP Acreage Maintenance

Producers enrolled in Agriculture Risk Coverage (ARC), Price Loss Coverage (PLC) or the Cotton Transition Assistance Program (CTAP) must protect all cropland and noncropland acres on the farm from wind and water erosion and noxious weeds. Producers who sign ARC county or individual contracts and PLC contracts agree to effectively control noxious weeds on the farm according to sound agricultural practices. If a producer fails to take necessary actions to correct a maintenance problem on a farm that is enrolled in ARC, PLC or CTAP, the County Committee may elect to terminate the contract for the program year.

Report Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock death losses in excess of normal mortality due to adverse weather and attacks by animals reintroduced into the wild by the federal government or protected by federal law. LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse weather, including losses due to hurricanes, floods, blizzards, wildfires, extreme heat or extreme cold.

For 2016, eligible losses must occur on or after Jan. 1, 2016, and before December 31, 2016. A notice of loss must be filed with FSA within 30 days of when the loss of livestock is apparent. Participants must provide the following supporting documentation to their local FSA office no later than 90 calendar days after the end of the calendar year for which benefits are requested:

- Proof of death documentation
- Copy of growers contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 400 pounds) = 3%. These established percentages reflect losses that are considered expected or typical under "normal" conditions. Producers who suffer livestock losses in 2016 must file both of the following:

- A notice of loss the earlier of 30 calendar days of when the loss was apparent or by January 30, 2017
- An application for payment by March 31, 2017.

Additional Information about LIP is available at your local FSA office or online at: www.fsa.usda.gov.

USDA Offers Help to Farmers and Ranchers Affected by Natural Disasters

The U.S. Department of Agriculture (USDA) reminds farmers and ranchers affected by recent wildfires, tornadoes and flooding that USDA has programs to assist with their recovery efforts. If you've experienced loss or damage to fencing, farm structures, livestock or other agricultural losses, contact your county's FSA office as soon as possible to report damage.

The Farm Service Agency (FSA) can assist farmers and ranchers who lost livestock, grazing land, fences or eligible trees, bushes and vines as a result of a natural disaster. FSA administers a suite of safety-net programs to help producers recover from eligible losses, including the Livestock Indemnity Program, the Livestock Forage Disaster Program, the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program, and the Tree Assistance Program.

In addition, the FSA Emergency Conservation Program provides funding and technical assistance for farmers and ranchers to rehabilitate farmland damaged by natural disasters and for carrying out emergency water conservation measures in periods of severe drought. Producers located in counties that received a primary or contiguous disaster designation are eligible for low-interest emergency loans to help them recover from production and physical losses. Compensation is also available to producers who purchased coverage through the Noninsured Crop Disaster Assistance Program, which protects non-insurable crops against natural disasters that result in lower yields, crop losses or prevented planting. To establish or retain FSA program eligibility, farmers and ranchers must report prevented planting and failed acres (crops and grasses). Prevented planting acreage must be reported on form FSA-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

The Natural Resources Conservation Service (NRCS) can assist producers with damaged grazing land as well as farmers, ranchers and forestland owners who find themselves in emergency situations caused by natural disasters. The NRCS Environmental Quality Incentives Program provides financial assistance to producers who agree to defer grazing on damaged land for two years. In the event that presidentially declared natural disasters, such as wildfires, lead to imminent threats to life and property, NRCS can assist local government sponsors with the cost of implementing conservation practices to address natural resource concerns and hazards through the Emergency Watershed Protection Program.

Farmers and ranchers with coverage through the federal crop insurance program administered by the Risk Management Agency (RMA) should contact their crop insurance agent to discuss losses due to fire or other natural causes of loss. Crop insurance is sold and delivered solely through private crop insurance agents. A list of crop insurance agents is available at all USDA Service Centers and online at the RMA Agent Locator.

When wildfires destroy or severely damage residential property, Rural Development (RD) can assist with providing priority hardship application processing for single family housing. Under a disaster designation, RD can issue a priority letter for next available multi-family housing units. RD also provides low-interest loans to community facilities, water environmental programs, businesses and cooperatives and to rural utilities.

For the first time in its 110-year history, the Forest Service, part of USDA, is spending more than 50 percent of its budget to suppress the nation's wildfires.

Today, fire seasons are 78 days longer than in the 1970s. Since 2000, at least 10 states have had their largest fires on record. **This year, there have been more than 46,000 fires.** Increasing development near forest boundaries also drives up costs, as more than 46 million homes and more than 70,000 communities are at risk from wildfire in the United States.

Visit http://go.usa.gov/3eDeF to learn more about USDA disaster preparedness and response. For more information on USDA disaster assistance programs, please contact your local USDA Service Center. To find your local USDA Service Center go to http://offices.usda.gov

USDA Expands Microloans to Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land.

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program, which celebrates its third anniversary this week, has been hugely successful, providing more than 16,800 low-interest loans, totaling over $373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to $50,000 to qualified producers, and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

This microloan announcement is another USDA resource for America's farmers and ranchers to utilize, especially as new and beginning farmers and ranchers look for the assistance they need to get started. To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office. To find your nearest office location, please visit http://offices.usda.gov.

April Loan Rates

- 90-Day Treasury Bill = 0.250%
- Farm Operating Loans — Direct = 2.25%
- Farm Ownership Loans — Direct = 3.50%
- Farm Ownership Loans — Direct Down Payment, Beginning Farmer or Rancher = 1.50%
- Emergency Loans = 3.25%

USDA Removes Farm Program Payments to Managers Not Actively Engaged in Farming

USDA finalized a rule to ensure that farm safety-net payments are issued only to active managers of farms that operate as joint ventures or general partnerships, consistent with the direction and authority provide by Congress in the 2014 Farm Bill. The action, which exempts family farm operations, closes a loophole where individuals who were not actively part of farm management still received payments.

Since 1987, the broad definition of "actively engaged" resulted in some general partnerships and joint ventures adding managers to the farming operation, qualifying for more payments, that did not substantially contribute to management. The rule applies to operations seeking more than one farm manager, and requires measureable, documented hours and key management activities each year. Some operations of certain sizes and complexity may be allowed up to three qualifying managers under limited conditions. The changes apply to payments for 2016 and subsequent crop years for Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) Programs, Loan Deficiency Payments (LDP) and Marketing Loan Gains (MLG) realized via the Marketing Assistance Loan program.

As required by Congress, the new rule does not apply to family farms, or change regulations related to contributions of land, capital, equipment, or labor. The changes go into effect for the 2016 crop year for most farms. Farms that have already planted fall crops for 2016 have until the 2017 crop year to comply. For more details, producers are encouraged to consult their local Farm Service Agency office.

USDA Financial Assistance Available to Help Organic Farmers Create Conservation Buffers

USDA is assisting organic farmers with the cost of establishing up to 20,000 acres of new conservation buffers and other practices on and near farms that produce organic crops.

The financial assistance is available from the USDA Conservation Reserve Program (CRP), a federally funded voluntary program that contracts with agricultural producers so that environmentally sensitive land is not farmed or ranched, but instead used for conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”) to control soil erosion, improve water quality and develop wildlife habitat. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

For conservation buffers, funds are available for establishing shrubs and trees, or supporting pollinating species, and can be planted in blocks or strips. Interested organic producers can offer eligible land for enrollment in this initiative at any time.

Other USDA FSA programs that assist organic farmers include:

- The Noninsured Crop Disaster Assistance Program that provides financial assistance for 55 to 100 percent of the average market price for organic crop losses between 50 to 65 percent of expected production due to a natural disaster.

- Marketing assistance loans that provide interim financing to help producers meet cash flow needs without having to sell crops during harvest when market prices are low, and deficiency payments to producers who forgo the loan in return for a payment on the eligible commodity.

- A variety of loans for operating expenses, ownership or guarantees with outside lenders, including streamlined microloans that have a lower amount of paperwork.

- Farm Storage Facility Loans for that provide low-interest financing to build or upgrade storage facilities for organic commodities, including cold storage, grain bins, bulk tanks and drying and handling equipment.

- Services such as mapping farm and field boundaries and reporting organic acreage that can be provided to a farm’s organic certifier or crop insurance agent.

USDA Regional Climate Change Hubs

Agriculture Secretary Tom Vilsack established the first ever USDA Regional Climate Change Hubs in February 2014 at seven locations around the country to provide more information to farmers, ranchers and forest landowners on the increasing risks of fires, pests, floods, and droughts associated with a changing climate. For information on the Climate Hub in your Region, visit http://climatehubs.oce.usda.gov and Click on the region to learn more.
