

Santosh Seshadri
GIS Coordinator/Programmer, Center for Geospatial Technology
Texas Tech University

Santosh Seshadri is a professional-level staff member at the Center for Geospatial Technology. Mr. Seshadri holds a Bachelors Degree in Mathematics and a Masters Degree in Economics from Texas Tech University. As a GIS Coordinator and Programmer he has been involved in GIS web and application development as well as geodatabase design and implementation for many projects. Most recently Mr. Seshadri developed a multi-user enterprise geodatabase and accompanying open source web mapping application using HTML5 and Jscript for the North Plains Underground Water Conservation District. He also developed a mobile web application for Bayer CropScience that delivers cotton planting forecast information using National Weather Service and local Mesonet soil data. He also teaches courses in Internet Mapping and GPS Field Mapping and Data Acquisition.
