

**JUNE 2005**

## **Conservation Reserve Enhancement Program (CREP II) (Southeast Area)**

### **Overview**

The Conservation Reserve Enhancement Program (CREP II) is a federal-state natural resource conservation program that works to meet state environmental objectives and to protect environmentally sensitive land on 120,000 acres in parts of Northwest, Southeast, and Southwestern Minnesota. Under CREP II, program participants voluntarily enroll certain practices in the USDA's Farm Service Agency (FSA) Conservation Reserve Program (CRP) and the Minnesota Re-invest in Minnesota (RIM) program.

Under CREP II, participants receive financial incentives for both the CRP and RIM contracts for removing cropland from agricultural production and converting the land to native grasses, trees, and other native vegetation along with completing wetland restorations. CRP is authorized by the Food Security Act of 1985, as amended.

CRP contracts are for 14 to 15 years and RIM easements are for 45 years or permanent (an exception is contour grass strips in Southeast Minnesota, which is restricted to 14 to 15-year CRP contracts only). The total cost of MN CREP II is about \$250 million, with FSA contributing \$200 million and the state funding \$50 million. The \$250 million does not include any costs that may be assumed by producers.

Minnesota CREP II targets enrollment to environmentally sensitive acreage in the Red River Watershed in northwestern Minnesota, the Lower Mississippi Watershed in southeastern Minnesota and the Missouri/Des Moines River Watershed in southwestern Minnesota.

The program is a results-oriented community-centered cooperative project among landowners, FSA, Minnesota Board of Water and Soil Resources (BWSR), local Soil and Water Conservation Districts (SWCD), Watershed Districts, Natural Resources Conservation Service (NRCS) and other partners.

### **Benefits**

The program will convert environmentally sensitive cropland to native vegetation in order to improve water quality, reduce soil erosion, reduce flood damage, increase flood water storage, and provide for fish and wildlife habitat. Establishment of certain practices in native vegetation will greatly reduce runoff of sediments, nutrients, pesticides, and pathogens from agricultural sources. CREP will also increase the water storage capacity of the watersheds through wetland restoration. Restoring native vegetation will also increase natural diversity and the population of many species, primarily grassland birds. Other agricultural impacts mitigated by CREP II include decreased fragmentation of riparian corridors, grasslands, and forestlands.

## Goals

The goals of the CREP II include:

- Reducing sediment loading in the three targeted watersheds by 420,000 tons per year;
- Reducing phosphorus loading in streams and rivers by 530,000 pounds per year and nitrogen levels by 3,000,000 pounds per year;
- Helping to protect the drinking water supplies of 250,000 people by enrolling up to 8,195 acres of land in sensitive groundwater areas through the use of 14 to 15-year CRP contracts and 45-year RIM easements;
- Enhancing long-term fish and wildlife habitat in the targeted watersheds for the preservation of natural diversity of Minnesota's biological resources, including threatened and endangered species;
- Helping to protect 2,500 linear miles of streams, rivers and ditches by enrolling up to 61,897 acres of riparian buffers through the use of 14 to 15-year CRP contracts and 45-year RIM easements;
- Restoring up to 24,000 acres of wetlands and adjacent upland acres through the use of 14 to 15-year CRP contracts and permanent RIM easements. These wetland restoration measures will also help reduce future flood damage by increasing water storage capacity by 10,000 to 20,000 acre feet per year;
- Restoring up to 5,000 acres of flood-damaged land through the use of 14 to 15-year CRP contracts and permanent RIM easements;
- Enrolling up to 18,058 acres of highly erodible cropland with an Erodibility Index (EI) of 15 or greater to reduce soil erosion and achieve related high-priority natural resource benefits;
- Enrolling up to 2,850 acres of highly erodible cropland with an EI of 8 or greater to help reduce soil erosion through the use of contour buffer strips.

Up to 120,000 new acres of environmentally sensitive land within the three designated watersheds will be targeted with the following enrollment goals:

- 51,000 acres in the Red River Watershed in northwestern Minnesota;
- 51,000 acres in the Upper Mississippi Watershed in southeastern Minnesota;
- 18,000 acres in the Missouri and Des Moines River Watershed in southwestern Minnesota.

## Basic Land Eligibility for CREP II in Southeast, MN

- Land must be cropland that is physically and legally capable of being cropped ;
- Has been cropped four of the six years (1996 – 2001);
- Excessively Eroded Cropland -Erodibility Index (EI) of 15 or greater;
- Erodible cropland (contour buffer strips) - EI of 8 or greater;
- Riparian Areas: perennial stream or a seasonal stream (containing water for only part of the year but more than just during and or after rainfall and snowmelt), wetland determined by Cowardin classification and permanent water body containing water throughout the year in all years;
- Wetland restoration – acres must be farmed wetlands, wetlands, prior converted wetlands that is entirely within or outside the 100-year floodplain for either CP23 or CP23A;
- Ground water protection – includes sinkholes and Karst areas; well head protection areas;
- Decorah shale outcrops – field determination is required based on county soil survey or County Geological Atlas;
- Certain Flood damage reduction areas.

## **Producer Eligibility**

- The cropland must have been owned or operated for 12 months prior to being offered.

## **Sign-up and Contract Duration**

Sign-up for the MN CREP II begins June 6, 2005, and continues until enrollment goals are attained, or through December 31, 2007, whichever comes first. Land enrolled in CREP remains under CRP contract for a period of 14 to 15 years, and a 45-year or perpetual RIM easement, as specified in the contract. The exception is practice CP15A-Contour Grass Strips which is a 14 to 15-year CRP only.

## **Approved Conservation Practices For The Lower Mississippi Watershed in Southeastern Minnesota:**

- CP2 Establishment of Permanent Native Grasses (15 years of CRP/45 years of RIM easement)
- CP3A Hardwood Tree Planting (15 years of CRP/45 years of RIM easement)
- CP4D Permanent Wildlife Habitat (15 years of CRP/45 years of RIM easement)
- CP12 Wildlife Food Plot (15 years of CRP/45 years or permanent RIM easement)
- CP15A Contour Grass Strips (15 years of CRP only)
- CP21 Filter Strips (15 years of CRP/45 years or permanent RIM easement if flood reduction)
- CP22 Riparian Buffer (15 years of CRP/45 years or permanent RIM easement if flood reduction)
- CP23 Wetland Restoration 100- Yr Flood Plain (15 years of CRP/permanent RIM easement)
- CP23A Wetland Restoration Non-Flood Plain (15 years of CRP/permanent RIM easement)

**Whole counties Southeast CREP area:** Goodhue, Wabasha, Dodge, Olmsted, Winona, Mower, Fillmore, Houston

**Partial counties Southeast CREP area:** Blue Earth, Dakota, Scott, Rice, Le Sueur, Waseca, Steele, Faribault, Freeborn

## **Payments**

Subject to contract terms and certain limitations, CREP participants will be eligible for the following types of FSA payments:

- A per acre annual rental payment based on the most current CRP soil rental rate.
- An additional 30 percent soil rental rate incentive
- An additional CRP maintenance rate.
- 50 percent of the eligible reimbursable costs (cost-share) to establish CREP II conservation practices. Cost-share reimbursement to CREP participants from all sources may not exceed 100 percent of the cost to install CREP conservation practices.
- A one-time Practice Incentive Payment (PIP) for CRP practices CP15A, CP21 and CP22 according to FSA's published national CRP directives.
- A one-time Signing Incentive Payment (SIP) for CRP practices CP21 and CP22 according to FSA's published national CRP directives.
- A one-time 25 percent incentive for restoring the hydrology of the site payment for practices CP23 and CP23A according to FSA's published national CRP directives.

Subject to contract terms and certain limitations, CREP II participants will be eligible for the following types of State RIM payments.

- Upfront RIM Signing Bonus payment.
- Cost-share not to exceed 100 percent of the eligible costs to install the CREP II Conservation practice after subtracting any CRP cost-share and PIP.

**Payment Example:**

10 acres of CP21 offered for 15 years of CRP enrollment and 45 years of RIM easement:

Annual Rental	10 x \$100 acre x 30% incentive + \$5 maintenance = \$1,350
Total of CRP annual Rental payment	\$1,350 x 15 years = \$20,250
SIP	10 acres x \$10 x 15 years = \$1,500
CRP cost share (c/s)	10 acres x \$110/acre practice installation cost = \$1,100 x 50% = \$550
PIP	\$550 x 80% = \$440
RIM c/s	\$1,100 practice installation cost less CRP c/s of \$550 and CRP PIP of \$440 = \$110 RIM c/s
RIM Bonus Payment	Based on a percentage of the county assessor's estimated township market value for tillable farmland in the township of enrollment and 45-year easement length (refer to the following website for these payments: <a href="http://www.bwsr.state.mn.us/CREP2/crepIIrates.pdf">http://www.bwsr.state.mn.us/CREP2/crepIIrates.pdf</a> )

**For More Information**

For more information about FSA and its programs, visit your local USDA Service Center or online at [www.fsa.usda.gov](http://www.fsa.usda.gov)

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C., 20250-9410, or call (202) 720-5964 (voice or TDD).
