

For: State and County Offices

Printing Reports for Incomplete Reconstitutions for the Current FY and Previous FY's

Approved by: Acting Deputy Administrator, Farm Programs

Bradley Karmen

1 Overview

A

Background

According to reports run on data uploaded from County Offices, there are a number of counties that have partial and pending reconstitutions that were initiated from FY 1997 through FY 2001 and were not updated. The reconstitution report software prints pending, partial, and pending partial reconstitution reports for the current FY and previous FY's.

County Offices are instructed to print these reports at specific times of the year from Reconstitution - Reports Main Menu MIRR00 according to 2-CM, Part 17.

B

Purpose

This notice provides instructions on handling the pending, partial, and pending partial reconstitutions that have not been completed.

Disposal Date	Distribution
February 1, 2003	State Offices; State Offices relay to County Offices

Notice CM-439

2 County Office Action

A

Current FY Reconstitutions

County Offices shall clear the current FY reconstitutions by following the procedure in:

- 2-CM, Part 14 for pending reconstitutions
- 2-CM, Part 15 for partial and pending partial reconstitutions.

Notes: Partial and pending partial reconstitutions are applicable to tobacco and peanut counties only.

All partial reconstitutions put on hold according to Notice CM-421 shall be completed.

Current FY reconstitutions shall be updated or deleted, as applicable, before farm record rollover is processed this fall. Farm record rollover will be stopped if any current FY pending, partial, or pending partial reconstitutions are detected on the system.

B

Previous FY Pending Reconstitutions

County Offices should research the previous FY's pending reconstitutions on the report and clear them.

County Offices shall not delete any of the pending reconstitutions listed for a previous FY unless the reconstitution was:

- initiated in error and should be deleted based on County Office research
- disapproved by COC.

Note: Deleting a pending reconstitution will delete the resulting farm or farms and all data associated with that farm through the current FY. After a farm is deleted, it cannot be recovered.

C

Previous FY Partial and Pending Partial Reconstitutions

County Offices should research the previous FY's partial and pending partial reconstitutions listed on the reports and clear them.

Partial and pending partial reconstitutions are applicable to tobacco and peanut counties only.

The ineffective crop on the partial reconstitution for a previous FY must be brought forward and updated using procedure in 2-CM, Part 15. Process the reconstitutions in numerical order from the oldest to the newest.

D

Error Messages

If an error message is received during the process of completing the reconstitution, send the following documents to the State Office reconstitution specialist:

- a copy of the error message in either of the following formats:
 - the automatic print of the error message
 - a screen print of **both** of the following:
 - the error message
 - the session status printed **before** the error message is cleared

Note: Access and print the session status information as follows:

- PRESS “SysRq Attn”
 - ENTER “5”, “Display Session Status”, and PRESS “Enter”
 - screen print the displayed information
 - PRESS “Cmd1”.
- diagnostic reports for the parent and resulting farms associated with that particular reconstitution, printed according to 2-CM, paragraph 525.

Submit documentation to the State Office reconstitution specialist.

Do **not** contact National Help Desk for these reconstitution problems.

E

Rerunning Reconstitution Reports

After completing the outstanding reconstitutions and before processing farm record rollover, rerun the applicable reports for all years, according to 2-CM, Part 17, to ensure that the reconstitutions have been cleared from the report or reports.

Farm record rollover will be stopped if any current FY pending, partial, or pending partial reconstitutions are detected on the system.

Notice CM-439

A Forwarding Documentation

The State Office reconstitution specialist shall:

- review the documentation submitted by the County Office
- resolve the problem with the County Office
- FAX the documents specified in subparagraph 2 D to PECD, Common Provisions Branch at 202-720-0051, if assistance is required.

Do **not** contact National Help Desk for these reconstitution problems unless directed to by the National Office.
