

For: State Offices

Missing Wetland Determinations in the FSA Wetland Points Layers

Approved by: Acting Deputy Administrator, Farm Programs

1 Wetland Determinations

A Background

8-CM, paragraph 194 states that all NRCS wetland determinations, both certified and non-certified, should be reflected in FSA’s wetland points GIS layer. With the recent switch from blue dots to red, yellow, and green point symbols, it was discovered that the wetland points layers in some State and County Offices may only contain NRCS-certified wetland determinations.

B Purpose

This notice instructs State Offices to determine if the FSA wetland points layers contain all NRCS wetland determinations, both certified and non-certified.

C State Office Action

State Offices shall:

- poll their County Offices to determine if the wetland points layers in their County Offices contain all NRCS wetland determinations, both certified and non-certified
- send a report by **September 1, 2007**, to Dan Culli at the National Office by e-mail at **daniel.culli@wdc.usda.gov** indicating whether or not their County Office’s wetland points layers contain all NRCS wetland determinations, both certified and non-certified.

Note: If there are inconsistencies between County Offices, the State Office shall indicate which County Offices have all determinations and which County Offices do not. If a State or individual County Office within a State do **not** have all wetland determinations in their layer, the State Office shall indicate the reason. If there are discrepancies between County Offices within a State, indicate the name of the State and County Offices, the FSA State and county codes, and the reason.

Disposal Date	Distribution
January 1, 2008	State Offices

Notice CP-619

1 Wetland Determinations (Continued)

D Contact

State Offices with questions or concerns about this notice shall contact Dan Culli at the National Office by either of the following:

- e-mail at **daniel.culli@wdc.usda.gov**
- telephone or 202-690-1942.
