

For: State and County Offices

Continuous CRP Software Deployment

Approved by: Deputy Administrator, Farm Programs

1 Software Deployment

A Background

The On-Line Continuous CRP Offer Software was released to State and County Offices on February 25, 2008. This software will accommodate the need to enroll environmentally desirable land devoted to certain conservation practices.

This software will:

- streamline the offer process for enrolling land in the continuous signup resulting in greater efficiency and better customer service
- calculate offer information, previously done manually, and interactively populate forms. Automating these calculations will reduce:
 - workload for each offer submitted
 - errors in form completion.

Functionalities of this software will enable County Offices to:

- collect producers' basic information to create the initial continuous CRP offer
- generate and print CRP-1 and CRP-2C
- view, edit, copy, and delete offers.

Disposal Date	Distribution
October 1, 2008 2-22-08	State Offices; State Offices relay to County Offices

Notice CRP-582

1 Software Deployment (Continued)

B Purpose

This notice informs State and County Offices of the following:

- that the software has been released
- benefits of software
- functionalities of software
- reference <http://dc.ffasintranet.usda.gov/dafp/cepdsto.htm> for additional information.

C Contact

If there are questions about this notice:

- County Offices shall contact the State Office
- State Offices shall contact Katina Hanson, CEPD, at 202-720-0062.
