FY 2009 CRP Acreage Reallocations

Approved by: Acting Deputy Administrator, Farm Programs

1 CRP Acreage Reallocations

A Background

Certain CRP initiatives and their associated continuous practices are limited by a national enrollment cap. States are allocated specific acreage amounts and instructed to ensure that their respective allocations are **not** exceeded.

Some State Offices have requested additional allocations for certain initiatives. State acreage allocations have been reviewed and adjustments for FY 2009 made for the following:

- practice CP23, Wetland Restoration
- practice CP23A, Wetland Restoration, Non Floodplain
- practice CP31, Bottomland Timber Establishment on Wetlands
- practice CP36, Longleaf Pine
- Conservation Reserve Enhancement Program (CREP).

Acres enrolled under CREP, regardless of conservation practice, do **not** count against a State's CRP conservation practice allocation.

Example: If 100 acres are enrolled under CREP for CP23, the 100 acres will **not** be included in the count toward the State's CRP CP23 enrollment allocation, but rather the acres will count toward CREP enrollment allocation.

Notes: No changes have been made to practice CP33 or CP37 allocations.

FY 2009 allocations for practices CP27, CP28, and CP38 will be issued in a forthcoming notice.
