Disabling 2005 Direct and Counter-Cyclical (CC) Payment Processing

Approved by: Deputy Administrator, Farm Programs

1 Overview

A Background

The Farm Security and Rural Investment Act of 2002 provided for direct and CC payments for covered commodities, oilseeds, and peanuts beginning with crop years 2002 through 2007. The 2005 direct and CC payment and overpayment processes use supporting files to determine whether a producer has been underpaid or overpaid. Because some of the supporting files only maintain data for the most current 3 years, some of the:

- outstanding payments **cannot** be processed because the supporting files **cannot** be updated
- producers may be listed on the overpayment register that are **not** actually overpaid.

B Purpose

This notice informs State and County Offices that:

- direct and CC payment and overpayment processing for crop year 2005 will be disabled after the installation of County Release No. 624

Note: The producer payment history (PPH) and CCC-509E will be the only processing options available after County Release No. 624 is installed.

- they will be required to submit documentation to the National Office where a 2005 direct or CC payment was earned by the producer, but **not** issued **before** County Release No. 624 disabled the payment processing software.
