

For: State and County Offices

Production Report System (PRS) Rollover and Dataloading 2010 Production

Approved by: Acting Deputy Administrator, Farm Programs

1 Overview

A Background

PRS was created in September 2010, as a means of capturing data to determine triggers for farms that elected and enrolled in ACRE. PRS recorded historical production for the 5 benchmark years 2004 through 2008 and actual production for 2009. See 2-DCP (Rev. 1), Part 7 for PRS procedure.

B Purpose

This notice informs State and County Offices of:

- the upcoming PRS rollover
- starting to collect actual production for 2010.

2 PRS Rollover and Dataloading 2010 Production in PRS

A PRS Rollover

PRS rollover is targeted for May 2011. The 2005 through 2008 data recorded in 2009 for the benchmark and actual farm yield calculations will be rolled into the 2010 benchmark farm yield calculation.

Production accepted manually that has not been recorded in 2009 PRS at rollover will **not** be rolled over to the 2010 PRS. **If 2009 production is not dataloaded into 2009 PRS, users will be required to dataload all 5 years to create the 2010 benchmark farm yield.** It is a priority that 2009 production is dataloaded in 2009 PRS **before** rollover occurs.

B Dataloading 2010 Production in PRS

After PRS is rolled over, 2010 benchmark and actual production will be available to be recorded in PRS.

Disposal Date	Distribution
June 1, 2011	State Offices; State Offices relay to County Offices
