

For: State and County Offices

**Processing New Price Support Eligibility and General Information Queries
Using APSS Software Provided in County Release No. 466**

Approved by: Acting Deputy Administrator, Farm Programs

1 Overview

**A
Background**

Basic Price Support eligibility queries that have provided "reasonable" production by crop based on County Office-entered COC-established yields specific to the County have been:

- functional in APSS for many years in a format that has remained essentially unchanged since their inception
- updated annually for the applicable Crop Year.

**B
New Queries for
Crop Year 2001**

Installation of County Release No. 466 provides State and County Offices with completely new Crop Year 2001 Price Support eligibility and general information on:

- "running account" eligibility queries that provide information **by crop or by producer** ID number under these data headings:
 - initial projected eligible quantity
 - actual quantity processed for loan or LDP to date
 - remaining projected eligible quantity.

Important: Each time a "running account" query is "run" it will provide "projected eligible quantities" based on reported acreage of farms covered by a Production Flexibility Contract, system-adjusted downward as loans and LDP's are processed through APSS for applicable producer(s).

Notice PS-411

1 Overview (Continued)

B

New Queries for Crop Year 2001 (Continued)

- farm-stored Loan/LDP general information queries that provide information by producer by bin number, or by producer by commodity class and bin number under these data headings:
 - ID number and crop year
 - Loan/LDP number
 - commodity class code
 - bin number
 - total quantity in bin
 - total Loan/LDP quantity for which a loan or LDP has already been taken

- cotton general information queries that provide receipt number, gin tag number, gin code, warehouse code, and bale weight for:
 - **LDP's** by producer, by:
 - all bales
 - a specific bale receipt number, for a specific gin code
 - a range of bale receipt numbers, for a specific gin code

 - **loans** by producer, by:
 - bale receipt number, for a specific gin code
 - range of bale receipt numbers, for a specific gin code.

Continued on the next page

Notice PS-411

1 Overview (Continued)

C

Purpose

This notice provides State and County Offices with:

- information about the menu path to new Price Support queries, see paragraph 2
- instructions for revising queries for county **irrigated** and **non-irrigated** yields and saving those revisions, see paragraph 3

Important: Crop Year 2001 queries provide production as a blend of reported irrigated and non-irrigated crop acreage, provided COC-established yields for both are entered according to paragraph 3.

- instructions for processing farm-stored loan/LDP queries, see paragraph 5, that list loans/LDP's for a producer by:
 - bin number
 - commodity class and bin number
 - instructions for processing cotton loan and LDP queries, see paragraph 6
 - instructions for "linking" files for queries, when applicable, see paragraph 7
 - Crop Year 2001 Price Support query names, see Exhibit 1.
-

D

Contact

State Offices shall direct questions about Price Support eligibility and general information queries to **Bruce Lake**, PSD, Automation Branch, by:

- telephone at 202-720-9889
 - email at Bruce_Lake@wdc.fsa.usda.gov.
-

3 Revising Queries for County Yields and Saving Revisions

A

Accessing Screens to Make Revisions

Each crop year in the past, after updated Price Support eligibility queries were installed, County Offices first had to:

- initiate price support query processing
- revise queries for applicable COC-established yields
- save revised query definitions.

This process remains unchanged for Crop Year 2001. Therefore, after accessing Menu PQA035 according to paragraph 2, County Offices shall follow this table for Crop Year 2001 to:

- access the "Work with Queries" screen
- initiate a **one-time run** to enable **new** query processing
- set COC-established for **both** irrigated and non-irrigated yields
- save revised queries.

Action	Result
<p>On new Price Support - Set Yield and Run Reports Menu PQA035:</p> <ul style="list-style-type: none"> • ENTER "1", "Set COC Established Yield" • PRESS "Enter". 	<p>A series of query functions run in the background that are unseen by the user. After these query functions finish running, the "Work with Queries" screen will be displayed. Go to subparagraph B.</p>

This is an example of the "Work With Queries" screen that appears **after** preliminary queries have run. County Offices shall follow instructions on the next page to revise and name the existing query.

```

                                WORK WITH QUERIES
-----

```

Continued on the next page

Notice PS-411

3 Revising Queries for County Yields and Savings Revisions (Continued)

B

"Work with Queries" Screen

County Offices shall follow this table to **revise** queries for setting the COC-established yields for both **irrigated** and **non-irrigated** crop yields. **This is a required action to enable Crop Year 2001 queries.** See Exhibit 1 for query names for non-irrigated and irrigated crops. For example, the query name for:

- non-irrigated barley is "BRLCN01", where "N" stands for non-irrigated
- irrigated barley is "BRLCI01", where "I" stands for irrigated.

Action	Result
<p>On the "Work with Queries" screen:</p> <ul style="list-style-type: none"> • ENTER "2", "Revise" • ENTER the applicable Query Name according to Exhibit 1 <p style="margin-left: 20px;">Note: "QRPRICE2" displays as the Query Library.</p> <ul style="list-style-type: none"> • PRESS "Enter". 	<p>The "Define the Query" screen will be displayed. Go to subparagraph C.</p>

This is an example of the "Work with Queries" screen for non-irrigated barley after a user has entered:

- "2" in the option field to revise the query
- query name "BRLCN01".

```

                                WORK WITH QUERIES

4 Running Account Eligibility Queries

A

Running Accounts

Each time a "running account" query is "run" it provides production data that has been system-adjusted **downward** as loans and LDP's are processed. This data can be listed by crop, or by crop by producer, and will be displayed under these column headings:

- initial projected eligible quantity
- actual quantity processed for loan or LDP to date
- remaining projected eligible quantity.

County Offices shall access running account queries according to this table.

Step	Action	Result
1	Access Menu PQA035 according to paragraph 2. On Menu PQA035, as applicable, ENTER either: <ul style="list-style-type: none"> • "2", "Running Account - Reasonable Eligibility by Crop" • "3", "Running Account - Reasonable Eligibility by Producer ID Number" • PRESS "Enter". 	The commodity Menu PQA01130 will be displayed and allow users to select the desired crop, see subparagraph B for an example.
2	On Menu PQA01130: <ul style="list-style-type: none"> • SELECT the desired crop by entering the applicable crop number in the "Enter the number of your selection" field • PRESS "Enter". 	If the entry in Step 1 was option: <ul style="list-style-type: none"> • "2", a series of query functions will run and an alphabetical report of all producers with their respective production, adjusted for year-to-date loan/LDP activity, will be printed; production will be reported as a "blend" of producers' reported irrigated and non-irrigated crop acreage • "3", a series of query functions will run and the "Select Records" screen will be displayed. Go to Step 3.
3	On the "Select Records" screen: <ul style="list-style-type: none"> • replace "99999999" with the applicable producer ID number in the "IDNUM" field • PRESS "Enter". 	A report of the producer's production, adjusted for year-to-date loan/LDP activity, will be printed; production will be reported as a "blend" of producers' reported irrigated and non-irrigated crop acreage.

7 Additional Information About Price Support Queries

A

Solving Problems

County Offices that encounter problems when running new Price Support queries shall:

- link unlinked files according to the general instructions in subparagraph B
 - request assistance from PSD through their State Office according to subparagraph 1 D.
-

B

Linking Files

Queries "run" only when the applicable files are linked to the correct file definitions in the current data dictionary. Usually, this linking process runs automatically and is not apparent to the user.

When the user receives a message that a particular file is not "linked" to the file definition, the user can link any unlinked query file with the correct file definition in the correct data dictionary by following steps similar to those provided in this table.

IF the message displayed is...	THEN, to link files, on a command line...
"File AQ.CRN not linked to a file definition ..."	<ul style="list-style-type: none">• type "IDDULINK LINK,AQ.CRN,IDDEF01,QW0102"• PRESS "Enter" to run link process. <p>In this case:</p> <ul style="list-style-type: none">• AQ.CRN represents the file name (corn)• IDDEF01 represents the data dictionary• QW0102 represents a unique file definition given by the programmer.
"File AQ.PL001 not linked to a file definition ..."	<ul style="list-style-type: none">• type, "IDDULINK LINK,AQ.PL001,IDDEF02,AQPL001"• PRESS "Enter" to run link process. <p>In this example:</p> <ul style="list-style-type: none">• AQ.PL001 represents the file name• IDDEF02 represents the data dictionary• AQPL001 represents the file definition.
