Processing Peanut Loan Repayments

Approved by: Deputy Administrator, Farm Programs

1 Do Not Use APSS for Peanut Loan Repayments

A

Background

Notice PS-439 provided instructions for 2002-crop peanut loan repayments. However, because of a problem with repayment calculations, County Offices were advised to discontinue processing peanut repayments using APSS. Notice LP-1888 provided guidelines on processing loan repayments including instructions on accepting repayments when APSS is inoperable.

Software was modified in County Release No. 501 that corrected the initial peanut loan repayment problem. However, in January 2003, a problem with the storage credit calculation was detected.

B

Purpose

This notice advises the State and County Offices to:

- immediately discontinue using APSS to process peanut repayments
- continue to follow Notice LP-1888 for accepting repayments when APSS is inoperable
- wait for modified software schedules to be released as soon as possible.

Disposal Date	Distribution
June 1, 2003	State Offices; States Offices relay to County Offices
