

For: State and County Offices

**Enhanced MILC Payments Corrections Software Release**

Approved by: Deputy Administrator, Farm Programs

**1 MILC Payments Correction Software**

**A Background**

Notice PS-663 and Web Application Transmittal Number 189 provided instructions to State and County Offices for processing MILC payments correction.

Because of the urgent need to correct MILC underpayments, the previous release of the MILC software was made available only with the limited "Underpayment Correction" functionality to make additional payments to producers who were previously underpaid.

**B Purpose**

This notice informs State and County Offices that the MILC Correction software has been enhanced to include the "Recheck Eligibility/AGI for Underpayments" functionality and "Overpayment Correction" functionality. See Web Application Transmittal Number 205 for additional information.

**Note: Creating overpayments because of producer ineligibility is not included in the current release. A future software modification will provide additional functionality.**

**C Action**

County Offices may access the MILC application to make corrections to payments that may result in either of the following:

- an underpayment that will create an additional payment
- an overpayment that will issue a receivable.

<b>Disposal Date</b>	<b>Distribution</b>
