

For: Wisconsin State and County Offices

**Calculating Producer Base Quota Level (BQL) for Cigar Filler and Binder Tobacco for
the Tobacco Transition Payment Program (TTPP)**

Approved by: Deputy Administrator, Farm Programs

1 Overview

A Background

The tobacco marketing quota and price support loan programs will end with the 2004 crop. Payments will be made under TTPP that are intended to help tobacco producers make the transition from a Federally regulated program which provided the safety net of price support loans, to an environment in which there will be no planting restrictions, no marketing cards, and no safety net of price support. Sign-up period for TTPP begins on March 14, 2005, and ends on June 17, 2005. If a producer does not sign up during this period, the producer will **not** receive a 2005 payment.

Payments will be based on an eligible producer's BQL and on the producer's share in the risk of producing the crop during any 2002, 2003, or 2004 crop year. An eligible producer who shared in the risk of producing the tobacco in all 3 years will be entitled to 100 percent of the producer rate, or \$3 per pound; an eligible producer who shared in the risk of producing the tobacco in any 2 of these years will be entitled to two-thirds of the producer rate, or \$2 per pound; and the producer who shared in the risk during 1 of these years will be entitled to one-third of the producer rate, or \$1 per pound. A farm's BQL may be different in 2002, 2003, and 2004 if special tobacco combinations were approved during 1 or more of those years.

B Purpose

This notice provides provisions for calculating BQL for producers of cigar filler and binder tobacco for the 2002, 2003, and 2004 crop years.

Disposal Date December 1, 2005	Distribution Wisconsin State Office; State Offices relay to applicable County Offices

Notice TB-1130

2 Calculating Producer BQL for Producers of Cigar Filler and Binder Tobacco

A Calculating BQL

BQL for cigar filler and binder tobacco farm for 2002, 2003, and 2004 crop years is the farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 crop years. No yield in excess of 4,000 pounds will be used to calculate BQL without verifiable production information. BQL shall be calculated according to subparagraphs B through D for each farm and producer.

Note: No yield shall exceed 5,000 pounds per acre for cigar filler/binder tobacco.

B 2002 BQL

Calculate the 2002 crop year farm and producer BQL according to the following.

Step	Action
1	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2002 farm base pounds total.
2	Multiply any 2002 special tobacco combination acres times the 2002 factor of 1.000
3	Multiply the sum from step 2 times the farm's average yield for 2001, 2002, and 2003 to get the 2002 farm special tobacco combination pounds total.
4	Add the sum from step 1 to the sum from step 3 to get the 2002 farm BQL total.
5	Multiply the sum from step 4 times the producer's share in the 2002 crop to get the producer 2002 BQL total.

C 2003 BQL

Calculate the 2003 crop year farm and producer BQL according to the following.

Step	Action
1	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2003 farm base pounds total.
2	Multiply any 2003 special tobacco combination acres times the 2003 factor of 0.8929
3	Multiply the sum from step 2 times the farm's average yield for 2001, 2002, and 2003 to get the 2003 farm special tobacco combination pounds total.
4	Add the sum from step 1 to the sum from step 3 to get the 2003 farm BQL total.
5	Multiply the sum from step 4 times the producer's share in the 2003 crop to get the producer 2003 BQL total.

Notice TB-1130

2 Calculating Producer BQL for Producers of Cigar Filler and Binder Tobacco (Continued)

D 2004 BQL

Calculate the 2004 crop year farm and producer BQL according to the following.

Step	Action
1	Multiply the 2002 farm's basic allotment times the farm's average yield for 2001, 2002, and 2003 to get the 2004 farm base pounds total.
2	Multiply any 2004 special tobacco combination acres times the 2004 factor of 0.9434
3	Multiply the sum from step 2 times the farm's average yield for 2001, 2002, and 2003 to get the 2004 farm special tobacco combination pounds total.
4	Add the sum from step 1 to the sum from step 3 to get the 2004 farm BQL total.
5	Multiply the sum from step 4 times the producer's share in the 2004 crop to get the producer 2004 BQL total.

3 Automation Software

A Generating TTPP Contracts, Reports, and Inquiries

Automation software to generate TTPP contracts, reports and inquiries will be a web-based application. Instructions will be provided in a future notice. The web-based application will calculate the producer BQL for cigar filler and binder tobacco.

4 Action

A State Office Action

State Office shall ensure that County Offices follow the provisions in this notice

B County Office Action

County Offices shall:

- follow the provisions in this notice
- calculate the 2002, 2003, and 2004 producer BQL for each cigar filler and binder with an effective allotment greater than zero for 2002, 2003 and 2004 crop years
