Sign up for the general Conservation Reserve Program (CRP) starts March 4 and runs through March 29, 2024

The U.S. Department of Agriculture (USDA) announced that agricultural producers and private landowners can begin signing up for the general Conservation Reserve Program (CRP) **starting March 4 and running through March 29, 2024**. The announcement was made earlier today by Zach Ducheneaux, Administrator of the USDA's Farm Service Agency (FSA) at this year's National Pheasant Fest, in Sioux Falls, SD.

On Nov. 16, 2023, President Biden signed into law H.R. 6363, the Further Continuing Appropriations and Other Extensions Act, 2024 (Pub. L. 118-22), which extended the Agriculture Improvement Act of 2018 (Pub. L. 115-334), more commonly known as the 2018 Farm Bill, through Sept. 30, 2024. This extension allows authorized programs, including CRP, to continue operating.

As one of the largest private lands conservation programs in the United States, CRP offers a range of conservation options to farmers, ranchers, and landowners. It has been an especially strong opportunity for farmers with less productive or marginal cropland, helping them re-establish valuable land cover to help improve water quality, prevent soil erosion, and support wildlife habitat.

Producers and landowners enrolled about 926,000 acres in General CRP in 2023, bringing the total of enrolled acres in General CRP to 7.78 million. This, combined with all other acres in CRP through other enrollment opportunities, such as Grassland and Continuous CRP, bring the current total of enrolled acres to 24.8 million.

General CRP

General CRP helps producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland. Additionally, General CRP includes a Climate-Smart Practice

Incentive to help increase carbon sequestration and reduce greenhouse gas emissions by helping producers and landowners establish trees and permanent grasses, enhance wildlife habitat, and restore wetlands.

General CRP is one of several ways agricultural producers and private landowners can participate in the program.

Other CRP Options

This past January FSA began accepting applications for the [Continuous CRP](#) signup. Under this enrollment, producers and landowners can enroll in CRP throughout the year. Offers are automatically accepted provided the producer and land meet the eligibility requirements and the enrollment levels do not exceed the statutory cap.

The USDA also offers financial assistance to producers and landowners enrolled in CRP to improve the health of their forests through the [Forest Management Incentive](#) (FMI), which can help participants with forest management practices, such as brush management and prescribed burning.

FSA will announce the dates for [Grassland CRP](#) signup in the near future.

Producers with expiring CRP acres can use the [Transition Incentives Program](#) (TIP), which incentivizes producers who sell or enter a long-term lease with a beginning, veteran, or socially disadvantaged farmer or rancher who plans to sustainably farm or ranch the land.

How to Sign Up

Landowners and producers interested in CRP should contact their local [USDA Service Center](#) to learn more or to apply for the program before their deadlines.
