

USDA Now Accepting Applications for Available Funds to Help Cover Organic Certification Costs

News Release | Kentucky | May 16, 2024

Kentucky

Kentucky, May 16, 2024 - Through the [Organic Certification Cost Share Program](#) (OCCSP), USDA's Farm Service Agency (FSA) will cover up to 75% of organic certification costs at a maximum of \$750 per certification category. FSA is now accepting applications, and organic producers and handlers should apply for OCCSP by the Oct. 31, 2024, deadline for eligible expenses incurred from Oct. 1, 2023, to Sept. 30, 2024. FSA will issue payments as applications are received and approved.

"Costs associated with obtaining organic certification can be a barrier for Kentucky producers wanting to get certified," said Dean Schamore, FSA State Executive Director in Kentucky. "Through OCCSP assistance, FSA helps Kentucky organic producers obtain certification and leverage related benefits like premium prices for commodities and access to broader markets and additional technical assistance."

OCCSP was part of a [broader organic announcement](#) made by Agriculture Secretary Tom Vilsack on May 15, 2024, which also included the Organic Market Development Grant program and Organic Transition Initiative.

Eligible Applicants, Expenses and Categories

OCCSP provides cost-share assistance to producers and handlers of organic agricultural commodities for expenses incurred obtaining or maintaining organic certification under USDA's [National Organic Program](#). Eligible OCCSP applicants include any certified organic producers or handlers who have paid organic certification fees to a USDA-accredited certifying agent. Cost share assistance covers expenses including application fees, inspection costs, fees related to equivalency agreement and arrangement requirements, inspector travel expenses, user fees, sales assessments and postage. OCCSP pays a maximum of \$750 per certification category for crops, wild crops, livestock, processing/handling, and state organic program fees (California only).

How to Apply

To apply, producers and handlers should contact FSA at their [local USDA Service Center](#) and be prepared to provide documentation of organic certification and eligible expenses. OCCSP applications can also be submitted through participating state departments of agriculture. For more information, visit the [OCCSP](#) webpage.

Opportunity for State Departments of Agriculture

FSA is also accepting applications from state departments of agriculture to administer OCCSP. FSA posted a [funding opportunity summary on grants.gov](#) and will electronically mail the Notice of Funding Opportunity to all eligible state departments of agriculture. Applications are due July 12, 2024.

If a state department of agriculture chooses to participate in OCCSP, both the state department of agriculture and FSA county offices in that state will accept OCCSP applications and make payments to eligible certified operations. Producers or handlers can receive OCCSP assistance from either FSA or the participating state department of agriculture but not both.

More Information

USDA offers other assistance for organic producers, including the [Organic Transition Initiative](#) (OTI), which includes direct farmer assistance for organic production and processing and conservation. For more information on organic agriculture, visit [farmers.gov/organic](#). ? ?

To learn more about FSA programs, producers can contact their local USDA Service Center. Producers can also prepare maps for acreage reporting as well as manage farm loans and view other farm records data and customer information by logging into their [farmers.gov account](#). If you don't have an account, sign up today.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
