# USDA Offers Disaster Assistance to Agricultural Producers in Virginia Impacted by Tropical Storm Chantal

**News Release | Virginia | July 21, 2025**

Virginia

**RICHMOND, Va., July 21, 2025**-Agricultural operations in Virginia have been significantly impacted by Tropical Storm Chantal and related weather events. The U.S. Department of Agriculture (USDA) has technical and financial assistance available to help farmers and livestock producers recover from these adverse weather events.

"USDA has a suite of programs to support farmers and ranchers as they recover from disasters," said Farm Production and Conservation Deputy Under Secretary Brooke Appleton. "I encourage impacted producers to contact their local USDA Service Center to report losses and learn more about program options available to assist in their recovery from crop, land, infrastructure, and livestock losses and damages."

## USDA Disaster Assistance

Producers who experience livestock deaths in excess of normal mortality or sell injured livestock at a reduced price may be eligible for the Livestock Indemnity Program (LIP). To participate in LIP, producers will have to provide acceptable documentation of death losses or evidence of reduced sales resulting from an eligible adverse weather event and must submit a notice of loss to the USDA Farm Service Agency (FSA) no later than March 2, 2026, for 2025 calendar year losses.

Meanwhile, the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP) provides eligible producers with compensation for feed and grazing losses. For ELAP, producers are required to complete a notice of loss and submit a payment application to their local FSA office no later than the annual program application deadline, March 2, 2026, for 2025 calendar year losses.

Additionally, eligible orchardists and nursery tree growers may be eligible for cost-share assistance through the Tree Assistance Program (TAP) to replant or rehabilitate eligible trees, bushes or vines. TAP complements the Noninsured Crop Disaster Assistance Program (NAP) or crop insurance coverage, which covers the crop but not the plants or trees in all cases. For TAP, a program application must be filed within 90 days of the disaster event or the date when the loss of the trees, bushes or vines is apparent.

"Impacted producers should timely report all crop, livestock and farm infrastructure damages and losses to their local FSA county office as soon as possible," said Sherina Logan, Deputy State Executive Director for FSA in Virginia. "As you evaluate your operation, take time to gather important documents you will need to get assistance, including farm records, herd inventory, receipts and pictures of damages or losses."

FSA also offers a variety of direct and guaranteed farm loans, including operating and emergency farm loans, to producers unable to secure commercial financing. Producers in counties with a primary or contiguous disaster designation may be eligible for low interest emergency loans to help them recover from production and physical losses. Loans can help producers replace essential property, purchase inputs like livestock, equipment, feed and seed, cover family living expenses or refinance

farm-related debts and other needs.

Additionally, FSA offers several loan servicing options available for borrowers who are unable to make scheduled payments on their farm loan programs debt to the agency because of reasons beyond their control.

The Farm Storage Facility Loan Program (FSFL) provides low-interest financing so producers can build, repair, replace or upgrade facilities to store commodities. Loan terms vary from three to 12 years. Producers who incurred damage to or loss of their equipment or infrastructure funded by the FSFL program should contact their insurance agent and their local USDA Service Center. Producers in need of on-farm storage should also contact USDA.

**Risk Management**

Producers with NAP coverage should report crop damage to their local FSA office and must file a Notice of Loss (CCC-576) within 15 days of the loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

Producers with risk protection through Federal Crop Insurance should report crop damage to their crop insurance agent within 72 hours of discovering damage and be sure to follow up in writing within 15 days.

"Crop insurance and other USDA risk management options are offered to help producers manage risk because we never know what nature has in store for the future," said Kevin Wooten, Director of USDA's Risk Management Agency (RMA) Regional Office that covers Virginia. "The Approved Insurance Providers, loss adjusters and agents are experienced and well-trained in handling these types of events."

**Conservation**

FSA's Emergency Conservation Program (ECP) and Emergency Forest Restoration Program (EFRP) can assist landowners and forest stewards with financial and technical assistance to restore fencing, damaged farmland or forests, and remove debris from feed stocks, water supplies and feeding areas.

**More Information**

Additional USDA disaster assistance information can be found on farmers.gov, including USDA resources specifically for producers impacted by hurricanes. Those resources include the Disaster Assistance Discovery Tool, Disaster-at-a-Glance fact sheet, Loan Assistance Tool, and Natural Disasters and Crop Insurance fact sheet. Additionally, FarmRaise offers an FSA educational hub with LIP and ELAP decision tools as well as farm loan resource videos. For FSA and NRCS programs, producers should contact their local USDA Service Center. For assistance with a crop insurance claim, producers and landowners should contact their crop insurance agent.
