

USDA Announces Dates for Conservation Reserve Program General and Grasslands Signups

News Release | Alaska | June 14, 2021

Palmer, Alaska, June 14, 2021 - The U.S. Department of Agriculture (USDA) has set a July 23, 2021, deadline for agricultural producers and landowners to apply for the Conservation Reserve Program (CRP) General signup 56. Additionally, USDA's Farm Service Agency (FSA) will accept applications for CRP Grasslands from July 12 to August 20. This year, USDA updated both signup options to provide great incentives for producers and increase its conservation benefits, including reducing the impacts of climate change.

Both signups are competitive and will provide for annual rental payments for land devoted to conservation purposes.

"We are excited to roll out our new and improved CRP General and Grasslands signups," said FSA Acting State Director Donna Kramer.

Bottom line, CRP now makes more financial sense for producers while also providing a bigger return on investment in terms of natural resource benefits. The General and Grasslands signups are part of a broader suite of tools available through CRP to integrate key conservation practices on our nation's working lands."

General Signup

Through CRP, producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality, and enhance wildlife habitat on cropland. Lands enrolled in CRP also play a key role in mitigating impacts from climate change, and FSA has added a new Climate-Smart Practice Incentive for practices that sequester carbon and reduce greenhouse gas emissions

FSA is also adding a one-time "inflationary" adjustment for payment rates, as well as having more flexibility on adjusting soil rental rates.

FSA opened the General Signup in January 2021 and extended the original deadline to July 23, 2021, to enable producers to consider FSA's new improvements to the program.

Grasslands Signup

[CRP Grasslands](#) helps landowners and operators protect grassland, including rangeland, and pastureland and certain other lands, while maintaining the areas as grazing lands. Protecting grasslands contributes positively to the economy of many regions, provides biodiversity of plant and animal populations, and improves environmental quality.

FSA has updated the Grasslands Signup to establish a minimum rental rate of \$15 per acre, as well as new National Grassland Priority Zones.

How to Sign Up

To enroll in the CRP General signup, producers and landowners should contact their local [USDA Service Center](#) by the July 23 deadline. To enroll in the CRP Grasslands signup, they should contact USDA by the August 20 deadline. While USDA offices may have limited visitors because of the pandemic, Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. To work with FSA, producers and landowners should contact their local [USDA Service Center](#). Contact information can be found at farmers.gov/service-locator.

More Information on CRP

Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. It was originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. The program marked its 35-year anniversary this past December.

Under the Biden-Harris Administration, USDA is engaged in a whole-of-government effort to combat the climate crisis and conserve and protect our nation's lands, biodiversity, and natural resources, including our soil, air and water. Through conservation practices, USDA aims to enhance economic growth and create new streams of income for farmers, ranchers, producers and private foresters. Successfully meeting these challenges will require USDA and our agencies to pursue a coordinated approach alongside USDA stakeholders, including state, local, and tribal governments.

USDA touches the lives of all Americans each day in so many positive ways. In the Biden-Harris Administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
