Deadline Extended to Apply for Pandemic Support for Certified Organic and Transitioning Operations

News Release | Iowa | December 21, 2021

Iowa

WASHINGTON, Dec. 21, 2021- The U.S. Department of Agriculture (USDA) has extended the deadline for agricultural producers who are certified organic, or transitioning to organic, to apply for the Organic and Transitional Education and Certification Program (OTECP). This program provides pandemic assistance to cover certification and education expenses. The deadline to apply for 2020 and 2021 eligible expenses is now Feb. 4, 2022, rather than the original deadline of Jan. 7, 2022.

"We listened to feedback from our stakeholders and are happy to provide organic producers, and those transitioning their operations, enough time to learn about the program and complete the application," said Zach Ducheneaux, FSA Administrator.

Signup for OTECP, administered by USDA's Farm Service Agency (FSA), began Nov. 8.

Program Background

Certified operations and transitional operations may apply for OTECP for eligible expenses paid during the 2020, 2021 and 2022 fiscal years. Signup for the 2022 fiscal year will be announced at a later date .

For each year, OTECP covers 25% of a certified operation's eligible certification expenses, up to $250 per certification category (crop, livestock, wild crop, handling and State Organic Program fee). This includes application fees, inspection fees, USDA organic certification costs, state organic program fees and more.

Crop and livestock operations transitioning to organic production may be eligible for 75% of a transitional operation's eligible expenses, up to $750, for each year. This includes fees charged by a certifying agent or consultant for pre-certification inspections and development of an organic system plan.

For both certified operations and transitional operations, OTECP covers 75% of the registration fees, up to $200, per year, for educational events that include content related to organic production and handling in order to assist operations in increasing their knowledge of production and marketing practices that can improve their operations, increase resilience and expand available marketing

opportunities. Additionally, both certified and transitional operations may be eligible for 75% of the expense of soil testing required under the National Organic Program (NOP) to document micronutrient deficiency, not to exceed $100 per year.

Producers apply through their local FSA office and can also obtain one-on-one support with applications by calling 877-508-8364. The program application and additional information can be found at farmers.gov/otecp.

Additional Organic Support

OTECP builds upon USDA's Organic Certification Cost Share Program (OCCSP) which provides cost share assistance of 50%, up to a maximum of $500 per scope, to producers and handlers of agricultural products who are obtaining or renewing their certification under the NOP. Although the application period for OCCSP ended Nov. 1, 2021, FSA will consider late-filed applications for those operations who still wish to apply.

Meanwhile, USDA's Risk Management Agency (RMA) recently made improvements to Whole-Farm Revenue Protection to make it more flexible and accessible to organic producers.
