

USDA Designates Several Nebraska Counties as Disasters Due to Drought

News Release | Nebraska | June 22, 2022

(LINCOLN, Nebraska - June 22, 2022) This stakeholder notification represents four separate Secretarial natural disaster designations. Such designations allow the United States Department of Agriculture (USDA) Farm Service Agency (FSA) to extend much-needed emergency credit to producers recovering from natural disasters through [emergency loans](#). Emergency loans can be used to meet various recovery needs including the replacement of essential items such as equipment or livestock, reorganization of a farming operation or the refinance of certain debts. FSA will review the loans based on the extent of losses, security available and repayment ability.

According to the [U.S. Drought Monitor](#), these counties suffered from a drought intensity value during the growing season of 1) D2 Drought-Severe for 8 or more consecutive weeks or 2) D3 Drought-Extreme or D4 Drought-Exceptional. The triggering disaster for all these counties is listed as drought.
