## Agricultural Producers Have Until March 15 to Enroll in USDA's Key Commodity Safety Net Programs

**News Release | Mississippi | March 03, 2023**

[View PDF](#)

Agricultural producers who have not yet enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs for the 2023 crop year have until March 15, 2023, to elect and enroll a contract. The U.S. Department of Agriculture (USDA) offers these two safety net programs to provide vital income support to farmers experiencing substantial declines in crop prices or revenues.

Producers can elect coverage and enroll in ARC-County or PLC, which are both commodity-by-commodity, or ARC-Individual, which covers the entire farm. Although election changes for 2023 are optional, producers must enroll through a signed contract each year. Additionally, if a producer has a multi-year contract on their farm and makes an election change for 2023, they will need to sign a new contract.

If producers do not submit an election by the March 15, 2023, deadline, the election remains the same as the 2022 election for commodities on the farm. Farm owners cannot enroll in either program unless they have a share interest in the commodity.

In Mississippi, producers have completed 15,526 contracts to date, representing 73.54% of the more than 21,114 expected contracts.

Producers who do not complete enrollment by the deadline will not be enrolled in ARC or PLC for the 2023 year and will not receive a payment if triggered.

Producers are eligible to enroll farms with base acres for the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

**Decision Tools?**

In partnership with USDA, two web-based decision tools are available to assist producers in making informed, educated decisions using crop data specific to their respective farming operations:???

- [Gardner-farmdoc Payment Calculator](#), a tool available through the University of Illinois allows producers to estimate payments for farms and counties for ARC-CO and PLC.??
- [ARC and PLC Decision Tool](#), a tool available through Texas A&M University that allows producers to estimate payments and yield updates and expected payments for 2023.????

### **Crop Insurance Considerations and Decision Deadline?**

ARC and PLC are part of a broader safety net provided by USDA, which also includes crop insurance and marketing assistance loans. Producers are reminded that ARC and PLC elections and enrollments can impact eligibility for some crop insurance products.?? ?

Producers on farms with a PLC election have the option of purchasing Supplemental Coverage Option (SCO) through their Approved Insurance Provider. However, producers on farms where ARC is the election are ineligible for SCO on their planted acres for that crop on that farm.??? ?

Unlike SCO, the Enhanced Coverage Option (ECO) is unaffected by an ARC election. Producers may add ECO regardless of the farm program election.??

Upland cotton farmers who choose to enroll seed cotton base acres in ARC or PLC are ineligible for the stacked income protection plan (STAX) on their planted cotton acres for that farm.?????

Producers should contact their crop insurance agent to make certain that the election and enrollment made at FSA follows their intention to participate in STAX or SCO coverage. Producers have until March 15, 2023, to make the appropriate changes or cancel their ARC or PLC contract. ?

For more information on ARC and PLC, producers can visit the [ARC and PLC webpage](#) or contact their [local USDA Service Center](#).
