

Agricultural Producers Have Until March 15 to Enroll in USDA's Key Commodity Safety Net Programs for the 2024 Crop Year

News Release | Idaho | February 22, 2024

Idaho Enrollment Currently At 59.1% of Expected Contracts

BOISE, IDAHO, Feb. 22, 2024 - Agricultural producers who have not yet enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs for the 2024 crop year have until March 15, 2024, to revise elections and sign contracts. Both safety net programs, delivered by USDA's Farm Service Agency (FSA), provide vital income support to farmers who experience substantial declines in crop prices or revenues for the 2024 crop year. In Idaho, producers have completed 8,669 contracts to date, representing 59.1% of the more than 14,660 expected contracts.

Producers can elect coverage and enroll in ARC-County or PLC, which provide crop-by-crop protection, or ARC-Individual, which protects the entire farm. Although election changes for 2024 are optional, producers must enroll, with a signed contract, each year. If a producer has a multi-year contract on the farm, the contract will continue for 2024 unless an election change is made. ?

If producers do not submit their election revision by the March 15, 2024, ?deadline, the election remains the same as their 2023 election for eligible commodities on the farm. ?Also, producers who do not complete enrollment and sign their contract by the deadline will not be enrolled in ARC or PLC for the 2024 year and will not receive a payment if one is triggered. ?Farm owners can only enroll in these programs if they have a share interest in the commodity.

Producers are eligible to enroll farms with base acres for the following commodities: ??barley, canola, large and small chickpeas, corn, ?crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat. ??

Crop Insurance Considerations

Producers are reminded that enrolling in ARC or PLC programs can impact eligibility for some crop insurance products offered by USDA's Risk Management Agency (RMA). Producers who elect and enroll in PLC also have the option of purchasing Supplemental Coverage Option (SCO) through their Approved Insurance Provider, but producers of covered commodities who elect ARC are ineligible for SCO on their planted acres.

Unlike SCO, RMA's Enhanced Coverage Option (ECO) is unaffected by participating in ARC for the same crop, on the same acres. You may elect ECO regardless of your farm program election.

More Information???

For more information on ARC and PLC, producers can visit the [ARC and PLC webpage](#) or contact their [local USDA Service Center](#). Producers can also prepare maps for acreage reporting as well as manage farm loans and view other farm records data and customer information by logging into their farmers.gov account. If you don't have an account, sign up today.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America's food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
