Trump Administration Announces Expedited Congressionally Mandated Disaster Assistance for Farmers

U.S. Secretary of Agriculture Brooke L. Rollins announced today that agricultural producers who suffered eligible crop losses due to natural disasters in 2023 and 2024 can now apply for \$16 billion in assistance through the [Supplemental Disaster Relief Program \(SDRP\)](#).

To expedite the implementation of SDRP, USDA's Farm Service Agency (FSA) is delivering assistance in two stages. This first stage is open to producers with eligible crop losses that received assistance under crop insurance or the Noninsured Crop Disaster Assistance Program during 2023 and 2024. Stage One sign up will start in person at FSA county offices on July 10 and prefilled applications are being mailed to producers today, July 9. SDRP Stage Two signups for eligible shallow or uncovered losses will begin in early fall.

SDRP Stage One

FSA is launching a streamlined, pre-filled application process for eligible crop, tree, and vine losses by leveraging existing Noninsured Crop Disaster Assistance

Program (NAP) and Risk Management Agency (RMA) indemnified loss data. The pre-filled applications will be mailed on July 9, 2025.

Eligibility

Eligible losses must be the result of natural disasters occurring in calendar years 2023 and/or 2024. These disasters include wildfires, hurricanes, floods, derechos, excessive heat, tornadoes, winter storms, freeze (including a polar vortex), smoke exposure, excessive moisture, qualifying drought, and related conditions.

To qualify for drought related losses, the loss must have occurred in a county rated by the [U.S. Drought Monitor](#) as having a D2 (severe drought) for eight consecutive weeks, D3 (extreme drought), or greater intensity level during the applicable calendar year.

Producers in Connecticut, Hawaii, Maine, and Massachusetts will not be eligible for SDRP program payments. Instead, these states chose to cover eligible crop, tree, bush, and vine losses through separate block grants. These block grants are funded through the \$220M provided for this purpose to eligible states in the American Relief Act.

How to Apply

To apply for SDRP, producers must submit the FSA-526, *Supplemental Disaster Relief Program (SDRP) Stage One Application*, in addition to having other forms on file with FSA.

SDRP Stage One Payment Calculation

Stage One payments are based on the SDRP adjusted NAP or Federal crop insurance coverage level the producer purchased for the crop. The net NAP or net federal crop insurance payments (NAP or crop insurance indemnities minus administrative fees and premiums) will be subtracted from the SDRP calculated payment amount.

For Stage One, the total SDRP payment to indemnified producers will not exceed 90% of the loss and an SDRP payment factor of 35% will be applied to all Stage One payments. If additional SDRP funds remain, FSA may issue a second payment.

Future Insurance Coverage Requirements

All producers who receive SDRP payments are required to purchase [federal crop insurance](#) or [NAP coverage](#) for the next two available crop years at the 60% coverage level or higher. Producers who fail to purchase crop insurance for the next two available crop years will be required to refund the SDRP payment, plus interest, to USDA.

SDRP Stage 2

FSA will announce additional SDRP assistance for uncovered losses, including non-indemnified shallow losses and quality losses and how to apply later this fall.

Learn more by visiting fsa.usda.gov/sdrp.

This announcement follows Secretary Rollins' comprehensive [plan](#) to deliver the total amount of Congressionally appropriated \$30 billion in disaster assistance to farmers and ranchers this year. These programs will complement the forthcoming state block grants that USDA is working with 14 different states to develop.

To date, USDA has issued more than \$7.8 billion in [Emergency Commodity Assistance Program \(ECAP\)](#) payments to eligible producers. Additionally, USDA has provided over \$1 billion in emergency relief through the [Emergency Livestock Relief Program](#) to producers who suffered grazing losses due to drought or wildfires in calendar years 2023 and 2024.

USDA disaster assistance information can be found on farmers.gov, including the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), [Loan Assistance Tool](#), and the [FarmRaise](#) online FSA education hub. Payment details will be updated here weekly. For more information, contact your local [USDA Service Center](#).

USDA Farm Loan Program Changes Now in Effect

The U.S. Department of Agriculture's (USDA) updates to the Farm Service Agency's (FSA) Farm Loan Programs are officially in effect. These changes, part of the [Enhancing Program Access and Delivery for Farm Loans rule](#), are designed to increase financial flexibility for agricultural producers, allowing them to grow their operations, boost profitability, and build long-term savings.

These program updates reflect USDA's ongoing commitment to supporting the financial success and resilience of farmers and ranchers nationwide, offering critical tools to help borrowers manage their finances more effectively.

What the new rules mean for you:

- Low-interest installment set-aside program: Financially distressed borrowers can now defer up to one annual loan payment at a reduced interest rate. This simplified option helps ease financial pressure while keeping farming operations running smoothly.
- Flexible repayment terms: New repayment options give borrowers the ability to increase their cash flow and build working capital reserves, allowing for long-term financial planning that includes saving for retirement, education, and other future needs.
- Reduced collateral requirements: FSA has lowered the amount of additional loan security needed for direct farm loans, making it easier for borrowers to leverage their existing equity without putting their personal residence at risk.

These new rules provide more financial freedom to borrowers. By giving farmers and ranchers better tools to manage their operations, we're helping them build long-term financial stability. It's all about making sure they can keep their land, grow their business, and invest in the future.

If you're an FSA borrower or considering applying for a loan, now is the time to take advantage of these new policies. We encourage you to reach out to your local FSA

farm loan staff to ensure you fully understand the wide range of loan making and servicing options available to assist with starting, expanding, or maintaining your agricultural operation.

To conduct business with FSA, please contact your [local USDA Service Center](#).

Producers and Landowners Can Now Enroll in USDA's Grassland Conservation Reserve Program

The U.S. Department of Agriculture (USDA) today announced that agricultural producers and private landowners can now enroll in the [Grassland Conservation Reserve Program](#) (Grassland CRP). The sign-up runs from today, July 14, to Aug. 8, 2025. Grassland CRP, offered by USDA's Farm Service Agency (FSA), is a voluntary working lands conservation program that enables participants to conserve grasslands while also continuing most grazing and haying practices.

Grassland CRP emphasizes support for grazing operations, plant and animal biodiversity, and grasslands and land with shrubs and forbs under the greatest threat of conversion.

“Through the conservation of America’s essential grasslands, Grassland CRP supports continued agricultural productivity while at the same time prioritizing private lands stewardship,” said FSA Administrator Bill Beam. “By offering landowners the best of both worlds — economic viability and working lands preservation — Grassland CRP provisions support USDA’s commitment to Farmers First.”

CRP, USDA’s flagship conservation program, celebrates its 40th anniversary this year. For four decades, CRP has provided financial and technical support to agricultural producers and landowners whose accepted acres are placed under contract for 10-15 years and who agree to voluntarily convert the land to beneficial vegetative cover to improve water quality, prevent soil erosion and support wildlife habitat. The American Relief Act, 2025, extended provisions for CRP through Sept. 30, 2025.

Currently, more than 25.8 million acres are enrolled in CRP, with nearly 9.7 million acres in Grassland CRP. On May 12, FSA opened General and Continuous CRP enrollment for 2025. FSA is currently reviewing submitted offers and will announce accepted offers at a later date. Due to the 27-million-acre statutory cap, only 1.8 million acres are available for all CRP enrollment this fiscal year.

Landowners and producers interested in Grassland CRP should contact their local [USDA Service Center](#) to learn more or apply for the program before the Aug. 8 deadline.

FSA helps America's farmers, ranchers and forest landowners invest in, improve, protect and expand their agricultural operations through the delivery of agricultural programs for all Americans. FSA implements agricultural policy, administers credit and loan programs, and manages conservation, commodity, disaster recovery and marketing programs through a national network of state and county offices and locally elected county committees. For more information, visit fsa.usda.gov.

USDA to Provide \$1 Billion to Livestock Producers Impacted by Drought or Wildfire in 2023 and 2024

The U.S. Department of Agriculture announced the release of Congressionally mandated Emergency Livestock Relief Program (ELRP) payments to cover grazing losses due to eligible drought or wildfire events in 2023 and/or 2024.

USDA's Farm Service Agency (FSA) is leveraging existing Livestock Forage Disaster Program (LFP) data to streamline payment calculations and expedite relief. Emergency relief payments are automatically issued for producers who have an approved LFP application on file for 2023 and/or 2024.

The *American Relief Act, 2025*, provided funds for emergency relief payments. This program is the first of two programs authorized to assist with eligible losses suffered by livestock producers. FSA will announce additional ELRP assistance for other losses authorized by the Act, including flooding, later this summer.

ELRP Eligibility

ELRP payment eligibility requires livestock producers to have suffered grazing losses in a county rated by the [U.S. Drought Monitor](#) as having a D2 (severe drought) for eight consecutive weeks or a D3 (extreme drought) or higher level of drought intensity during 2023, 2024 or both calendar years, and have applied and been approved for LFP.

Additionally, producers whose permitted grazing on federally managed lands was reduced due to wildfire are also eligible for ELRP, if they applied and were approved for LFP in 2023, 2024 or both calendar years.

To streamline and simplify the delivery of ELRP benefits, producers are not required to submit an application for payment; however, they must have the following forms on file with FSA:

- CCC-853, *Livestock Forage Disaster Program Application*
- [Form AD-2047](#), *Customer Data Worksheet*.
- [Form CCC-902](#), *Farm Operating Plan* for an individual or legal entity.
- [Form CCC-901](#), *Member Information for Legal Entities* (if applicable).
- Form FSA-510, *Request for an Exception to the \$125,000 Payment Limitation for Certain Programs* (if applicable). This form is required to be on file for both 2023 and 2024 to be eligible for the payment limitation exception.
- [SF-3881](#), *Direct Deposit*.

- [AD-1026](#), *Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification*.

Most producers, especially those who have previously participated in FSA programs, likely have these forms on file. However, those who are uncertain and want to confirm the status of their forms, can contact their [local FSA county office](#).

ELRP Payment Calculation

To expedite payments to eligible livestock producers, determine eligibility, and calculate an ELRP payment, FSA uses livestock inventories and drought-affected forage acreage or restricted animal units and grazing days due to wildfire already reported by the producer on the CCC-853, *Livestock Forage Disaster Program Application* form, for 2023, 2024 or both calendar years.

ELRP payments will be equal to the eligible livestock producer's gross LFP calculated payment for the calendar year multiplied by an ELRP 2023 or 2024 payment factor to determine the total gross ELRP payments for 2023 and/or 2024. The initial payment factor for 2023 and 2024 ELRP payments is 35%. If additional funds remain, FSA may issue a second payment.

Supplemental Disaster Assistance Timeline

USDA is fully committed to expediting remaining disaster assistance provided by the *American Relief Act, 2025*. On May 7, we launched our [2023/2024 Supplemental Disaster Assistance public landing page](#) where the status of USDA disaster assistance and block grant rollout timeline can be tracked. The page is updated regularly and accessible through fsa.usda.gov.

The Act also authorized \$10 billion in economic loss assistance to producers of covered commodities based on 2024 planted and prevented planted acres. To date, USDA has delivered more than \$7.7 billion to producers through the [Emergency Commodity Assistance Program \(ECAP\)](#). The ECAP deadline is Aug. 15, 2025. Contact your local FSA county office for information.

To learn more visit the [ELRP website](#).

USDA Reminds Producers to File Crop Acreage Reports

After spring planting is complete, agricultural producers should make an appointment with their local Farm Service Agency (FSA) to complete crop acreage reports before the applicable deadline.

How to File a Report

A [crop acreage report](#) documents a crop grown on a farm or ranch, its intended use and location. Producers should file an accurate crop acreage report for all crops and land uses, including failed acreage and prevented planted acreage before the applicable deadline.

To file a crop acreage report, producers need to provide:

- Crop and crop type or variety
- Intended crop use
- Number of crop acres
- Map with approximate crop boundaries
- Planting date(s)
- Planting pattern, when applicable
- Producer share(s)
- Irrigation practice(s)
- Acreage prevented from planting, when applicable
- Other required information

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting deadline, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the acreage reporting deadline, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP-covered crops is the acreage reporting date or 15 calendar days before grazing or crop harvesting begins, whichever is earlier.

Producers with perennial forage crops should check with their local FSA office to see if their crops are eligible for continuous certification, which rolls the certified acreage forward each year until a change is made.

Farmers.gov Portal

Producers can access their FSA farm records, maps, and common land units through the farmers.gov customer portal. The portal allows producers to export field boundaries as shapefiles and import and view other shapefiles, such as precision agriculture boundaries within farm records mapping. Producers can view, print and label their maps for acreage reporting purposes. A login.gov account that is linked to a USDA customer record is required to use the portal.

Producers can visit farmers.gov/account to learn more about creating an account. Producers who have the authority to act on behalf of another customer as a grantee via an FSA-211 *Power of Attorney* form, Business Partner Signature Authority or as a member of a business with signature authority can now access information for the business in the farmers.gov portal.

Electronic Geospatial Acreage Reporting

Acreage reports using precision agriculture planting boundaries can be filed electronically with an approved insurance provider or an authorized third-party provider, who will then share the file with FSA staff. Producers should notify their local FSA office if they submitted an electronic geospatial acreage report containing

precision planting boundaries that they want to use as part of their FSA acreage report.

More Information

For more information, producers should contact the local County FSA office.

Annual Review of Payment Eligibility for New Crop Year

FSA and NRCS program applicants for benefits are required to submit a completed CCC-902 Farming Operation Plan and CCC-941 Average Gross Income (AGI) Certification and Consent to Disclosure of Tax Information for FSA to determine the applicant's payment eligibility and establish the maximum payment limitation applicable to the program applicant.

Participants are not required to annually submit new CCC-902s for payment eligibility and payment limitation purposes unless a change in the farming operation occurs that may affect the previous determination of record. A valid CCC-902 filed by the participant is considered to be a continuous certification used for all payment eligibility and payment limitation determinations applicable for the program benefits requested.

Participants are responsible for ensuring that all CCC-902 and CCC-941 and related forms on file in the county office are updated, current, and correct. Participants are required to timely notify the county office of any changes in the farming operation that may affect the previous determination of record by filing a new or updated CCC-902 as applicable.

Changes that may require a new determination include, but are not limited to, a change of:

- Shares of a contract, which may reflect:
 - A land lease from cash rent to share rent
 - A land lease from share rent to cash rent (subject to the cash rent tenant rule)
 - A modification of a variable/fixed bushel-rent arrangement
- The size of the producer's farming operation by the addition or reduction of cropland that may affect the application of a cropland factor
- The structure of the farming operation, including any change to a member's share
- The contribution of farm inputs of capital, land, equipment, active personal labor, and/or active personal management
- Farming interests not previously disclosed on CCC-902 including the farming interests of a spouse or minor child
- Certifications of average AGI are required to be filed annually for participation in an annual USDA program. For multi-year conservation contracts and NRCS easements, a certification of AGI must be filed prior to

approval of the contract or easement and is applicable for the duration of the contract period.

Participants are encouraged to file or review these forms within the deadlines established for each applicable program for which program benefits are being requested.

Marketing Assistance Loans and Loan Deficiency Payments for Wool, Mohair and Unshorn Pelts

Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs) provide financing and marketing assistance for producers of many commodities, including graded and non-graded wool, mohair, and unshorn pelts. MALs and LDPs are available during shearing and provide interim financing to help you meet cash flow needs without having to sell commodities when market prices are low, enabling you to delay selling until more favorable marketing conditions emerge. LDPs are payments made to producers who, although eligible to obtain an MAL, agree to forgo the loan in return for a payment on the eligible commodity.

FSA is now accepting requests for 2025 MALs and LDPs for all eligible wool, mohair and unshorn pelts. These requests should be made on or before the final availability date of Jan. 31, 2026. USDA recently announced [2025 wool and mohair marketing assistance loan rates](#).

Eligibility

To be eligible for a wool or mohair MAL or LDP, producers must produce and shear eligible mohair and wool in the U.S. during the applicable crop year and must:

- comply with conservation and wetland protection requirements;
- report all cropland acreage on applicable farms where the eligible commodity is produced;
- have and retain beneficial interest in the commodity until the MAL is repaid or the Commodity Credit Corporation (CCC) takes title to the commodity, and;
- meet Adjusted Gross Income (AGI) limitations.

Unshorn pelts are eligible for LDPs only. In addition to the criteria above, producers of unshorn pelts must have sold the unshorn lamb for immediate slaughter or slaughter the lambs for personal use. LDPs and marketing loan gains are not subject to payment limitation, including actively engaged in farming and cash rent tenant provisions.

In addition to producer eligibility, the loan commodity must have been produced and shorn from live animals by an eligible producer, be in storable condition, and meet specific CCC minimum grade and quality standards. Producers are responsible for any loss in quantity or quality of the wool or mohair pledged as loan collateral.

To retain beneficial interest, the producer must have control and title of the wool, mohair, or unshorn pelt. If beneficial interest in the commodity is lost, the commodity loses eligibility for an MAL or LDP and remains ineligible even if the producer later regains beneficial interest. The producer must be able to make all decisions affecting the commodity including movement, sale, and the request for an MAL or LDP.

Producers may repay an MAL any time during the loan period at the lesser of the loan rate plus accrued interest and other charges or an alternative loan repayment rate, the national posted price, which is announced weekly. Visit the Farm Service Agency (FSA) website for [posted loan and LDP rates](#).

How to Apply

Producers can apply for an MAL by contacting their local FSA county office. To be considered for a LDP, **producers must first have the form CCC-633 EZ, Page 1, on file with FSA** prior to losing beneficial interest in the wool, mohair or unshorn pelt. **It is best to visit the county office and submit the CCC-633 Page 1 right before you shear.** This is completed one time per crop year and indicates your intention to receive LDP benefits.

To apply and learn more information, contact your [local USDA Service Center](#) or visit fsa.usda.gov.

Transitioning Expiring CRP Land to Beginning, Veteran or Socially Disadvantaged Farmers and Ranchers

Conservation Reserve Program (CRP) contract holders are encouraged to transition their CRP acres to beginning, veteran or socially disadvantaged farmers or ranchers through the Transition Incentives Program (TIP). TIP provides annual rental payments to the landowner or operator for up to two additional years after the CRP contract expires.

CRP contract holders no longer need to be a retired or retiring owner or operator to transition their land. TIP participants must agree to sell, have a contract to sell, or agree to lease long term (at least five years) land enrolled in an expiring CRP contract to a beginning, veteran, or socially disadvantaged farmer or rancher who is not a family member.

Beginning, veteran or social disadvantaged farmers and ranchers and CRP participants may enroll in TIP beginning two years before the expiration date of the CRP contract. The TIP application must be submitted prior to completing the lease or sale of the affected lands. New landowners or renters that return the land to production must use sustainable grazing or farming methods.

For more information, contact your local County USDA Service Center or visit fsa.usda.gov.

Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, **but are not limited to**, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, the request will be denied. Although there are exceptions regarding the Stafford Act and emergencies, it's important to wait until you receive written approval of your project proposal before starting any actions.

Applications cannot be approved until FSA has copies of all permits and plans. Contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.

Is the Noninsured Crop Disaster Assistance Program Right for You?

Farmers and ranchers rely on crop insurance to protect themselves from disasters and unforeseen events, but not all crops are insurable through the USDA's Risk Management Agency. The Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) provides producers another option to obtain coverage against disaster for these crops. NAP provides financial assistance to producers of non-insurable crops impacted by natural disasters that result in lower yields, crop losses, or prevents crop planting.

Commercially produced crops and agricultural commodities for which crop insurance is not available are generally eligible for NAP. Eligible crops include those grown specifically for food, fiber, livestock consumption, biofuel or biobased products, or value loss crops such as aquaculture, Christmas trees, ornamental nursery, and others. Contact your local FSA office to see which crops are eligible in your state and county.

Eligible causes of loss include drought, freeze, hail, excessive moisture, excessive wind or hurricanes, earthquake and flood. These events must occur during the NAP policy coverage period, before or during harvest, and the disaster must directly affect the eligible crop. For guidance on causes of loss not listed, contact your local FSA county office.

Interested producers apply for NAP coverage and pay the applicable service fee at the FSA office where their farm records are maintained. These must be filed by the

application closing date, which varies by crop. Contact your local FSA office to verify application closing dates and ensure coverage for eligible NAP crops.

At the time of application, each producer acknowledges they have received the [NAP Basic Provisions](#), which describes NAP requirements for coverage. NAP participants must report crop acreage shortly after planting and provide verifiable or reliable crop production records when required by FSA.

Producers are required to pay service fees which vary depending on the number of crops and number of counties your operation is located in. The NAP service fee is the lesser of \$325 per crop or \$825 per producer per administrative county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties. Premiums also apply when producers elect higher levels of coverage with a maximum premium of \$15,750 per person or legal entity.

A producer's certification on Form CCC-860 *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification* may serve as an application for basic NAP coverage for all eligible crops beginning with crop year 2022. These producers will have all NAP-related service fees for basic coverage waived, in addition to a 50 percent premium reduction if higher levels of coverage are elected.

For more detailed information on NAP, download the [NAP Fact Sheet](#). To get started with NAP, we recommend you contact your [local USDA service center](#).
