Message from the Executive Director

The 2018 Farm Bill builds upon many of the crucial Farm Service Agency (FSA) programs that serve our agricultural producers. The over-reaching goal of keeping agriculture stable, sustainable, and healthy remains strong. The Farm Bill is an important tool.

However, it doesn't work without the dedication of local FSA staff working closely with producers so they can use it to make the best decisions for their land and resources.

The new Farm Bill embraces streamlining and simplifying FSA programs to improve customer service. Enhancements have been made to safety net, disaster relief, price support, conservation and farm loan programs. Eligibility requirements have been changed and the definition of "family member" expanded. FSA continues to offer the types of assistance producers expect and constantly strives to improve the quality of programs and services. Please contact your County FSA Office for more information about 2018 Farm Bill changes.

Ronald Givens - Member
Pete Arambel - Member

To find contact information for your local office go to www.fsa.usda.gov/wy

Several important deadlines to remember:

December 1, 2019 - 2020 Non-Insured Crop Disaster Assistance Program (NAP) sign up deadline for all perennial grasses, alfalfa, clover, mixed forage, honey, and most perennial fruits and vegetables

December 2, 2019 - COC Election ballots must be returned to the County FSA office

December 6, 2019 - 2019 Market Facilitation Program (MFP) sign up deadline

December 15, 2019 - Acreage reporting deadline for wheat and other fall-planted small grains

In production agriculture, we all experience challenges and anxieties that constantly influence our character and well-being. I recently attended a national FSA meeting where national leaders discussed how stress and uncertainty is adversely affecting our producers nationwide. Unpredictable weather, untimely breakdowns, time constraints, health concerns and economic issues can cause stress in the lives of farm and ranch families. We, in agriculture, work very hard day in and day out. When we have a disappointing harvest or see that we have more bills than our resources can support it can be – it is very discouraging. Please seek immediate help for yourself or others in your family or community who are experiencing extreme stress. It is important to the future of our industry and your family that you are healthy physically and mentally.

I remain very confident in the future of agriculture. Have a great harvest season!!

-Lois Van MARK-

USDA Opens 2019 Enrollment for Agriculture Risk Coverage and Price Loss Coverage Programs

Agricultural producers can now enroll in the [Agriculture Risk Coverage \(ARC\) and Price Loss Coverage \(PLC\) programs](#), two popular safety net programs, for the 2019 crop year. Interested producers must sign up for either program by March 15, 2020.

The 2018 Farm Bill reauthorized and made updates to these two USDA Farm Service Agency (FSA) programs. ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guarantee level. PLC program provides income support payments on historical base acres when the price for a covered commodity falls below its effective reference price.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium

grain rice (which includes short grain rice), safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Updated provisions in the 2018 Farm Bill allow producers with an interest in a farm to enroll and elect coverage in crop-by-crop ARC-County or PLC, or ARC-Individual for the entire farm, for program year 2019. The election applies to both the 2019 and 2020 crop years. If a 2019 election is not submitted by the deadline of March 15, 2020, the election defaults to the current elections of the crops on the farm established under the 2014 Farm Bill. No payments will be earned in 2019 if the election defaults.

For crop years 2021 through 2023, producers will have an opportunity to make new elections. Farm owners cannot enroll in either program unless they have a share interest in the farm.

Once the 2019 election and enrollment are completed, producers on the farm for 2020 can complete an enrollment contract for the 2020 crop year beginning Oct. 7, 2019 and ending June 30, 2020.

Although 2019 enrollment begins Sept. 3, 2019 and must occur first, a producer waiting until Oct. 7, 2019 to enroll is afforded the opportunity to enroll in either program for both 2019 and 2020 during the same office visit. During this time, farm owners have a one-time opportunity to update PLC payment yields that takes effect beginning with crop year 2020. If the owner accompanies the producer to the office, the yield update may be completed during the same office visit.

In partnership with USDA, the University of Illinois and Texas A&M University are offering web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. These decision tools can be found at fsa.usda.gov/arc-plc.

Producers are reminded that enrolling in ARC or PLC programs can impact eligibility for some forms of crop insurance. Producers who elect and enroll in PLC also have the option of purchasing Supplemental Coverage Option (SCO) through the [USDA Risk Management Agency \(RMA\)](#). Producers of covered commodities who elect ARC are ineligible for SCO on their planted acres.

For more information on ARC and PLC, download our [program fact sheet](#) or our [2014-2018 farm bills comparison fact sheet](#), or visit fsa.usda.gov/arc-plc.

New Improvement to Streamline Crop Reporting

Update Lets Farmers and Ranchers Report Common Acreage Information Once

Farmers and ranchers filing crop acreage reports with the Farm Service Agency (FSA) and participating insurance providers approved by the Risk Management Agency (RMA) now can provide the common information from their acreage reports at one office and the information will be electronically shared with the other location.

This new process is part of the USDA Acreage Crop Reporting Streamlining Initiative (ACRSI). This interagency collaboration also includes participating private crop insurance agents and insurance companies, all working to streamline the information collected from farmers and ranchers who participate in USDA programs.

Once filing at one location, data that's important to both FSA and RMA will be securely and electronically shared with the other location avoiding redundant and duplicative reporting, as well as saving farmers and ranchers time.

Producers must still visit both their local FSA office and their insurance provider to validate and sign acreage reports, complete maps, or provide program-specific information, including reporting uninsured crops to FSA. The common data from the first-filed acreage report will now be available to pre-populate and accelerate completion of the second report.

USDA has been working to streamline the crop reporting process for agricultural producers, who have expressed concerns with providing the same basic common information for multiple locations. In 2013, USDA consolidated the deadlines to 15 dates for submitting these reports, down from the previous 54 dates at RMA and 17 dates for FSA. USDA representatives believe farmers and ranchers will experience a notable improvement in the coming weeks as they approach the peak season for crop reporting later this summer.

More than 93 percent of all annual reported acres to FSA and RMA now are eligible for the common data reporting, and USDA is exploring adding more crops. Plans are underway at USDA to continue building upon the framework with additional efficiencies at a future date.

Farmers and ranchers are also reminded that they can now access their FSA farm information from the convenience of their home computer. Producers can see field boundaries, images of the farm, conservation status, operator and owner information and much more.

The new customer self-service portal, known as **FSAFarm+**, gives farmers and ranchers online access to securely view, print or export their personal farm data. To enroll in the online service, producers are encouraged to contact their local FSA office for details. To find a local FSA office in your area, visit <http://offices.usda.gov>.

Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally-funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, **but are not limited to**, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, this will result in a denial of the request. There are exceptions regarding the Stafford Act and emergencies. It is important to wait until you receive written approval of your project proposal before starting any actions, including, but not limited to, vegetation clearing, site preparation or ground disturbance.

Remember to contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.

Applications cannot be approved contingent upon the completion of an environmental review. FSA must have copies of all permits and plans before an application can be approved.

Transitioning Expiring CRP Land to Beginning, Veteran or Underserved Farmers and Ranchers

Retired or retiring landowners or operators are encouraged to transition their Conservation Reserve Program (CRP) acres to beginning, veteran or underserved farmers or ranchers through the Transition Incentives Program (TIP). TIP provides annual rental payments to the retiring farmer for up to two additional years after the CRP contract expires, provided the transition is not to a family member.

Enrollment in TIP is on a continuous basis. Beginning, veteran or underserved farmers and ranchers and retiring CRP participants may enroll in TIP beginning one year before the expiration date of the CRP contract or Aug. 23. For example, if a CRP contract is scheduled to expire on Sept. 30, 2019, the land may be offered for enrollment in TIP beginning June 3, 2019, through Aug. 23, 2019. The Aug. 23 deadline allows the Natural Resources Conservation Service (NRCS) time to complete the TIP sustainable grazing or crop production conservation plans. The TIP application must be submitted prior to completing the lease or sale of the affected lands.

New landowners or renters must return the land to production using sustainable grazing or farming methods.

For more information on TIP, visit <https://www.fsa.usda.gov/conservation>.

New Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

A new online tool can help farmers and ranchers find information on U.S. Department of Agriculture (USDA) farm loans that may best fit their operations. USDA has launched the new *Farm Loan Discovery Tool* as the newest feature on farmers.gov, the Department's self-service website for farmers.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help. Compared to this time last year, FSA has seen an 18 percent increase in the amount it has obligated for direct farm ownership loans, and through the 2018 Farm Bill, has [increased the limits](#) for several loan products.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will be provided information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility

requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting farmers.gov/fund and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

With feedback from customers and field employees who serve those customers, farmers.gov delivers farmer-focused features through an agile, iterative process to deliver the greatest immediate value to America’s agricultural producers – helping farmers and ranchers do right, and feed everyone.

For more information or to locate your USDA Service Center, visit farmers.gov.

Maintaining Good Credit History

Farm Service Agency (FSA) Farm Loan programs require that applicants have a satisfactory credit history. A credit report is requested for all FSA direct farm loan applicants. These reports are reviewed to verify outstanding debts, if bills are paid timely and to determine the impact on cash flow.

Information found on a customer’s credit report is strictly confidential and is used only as an aid in conducting FSA business.

Our farm loan staff will discuss options with you if you have an unfavorable credit report and will provide a copy of your report. If you dispute the accuracy of the information on the credit report, it is up to you to contact the issuing credit report company to resolve any errors or inaccuracies.

There are multiple ways to remedy an unfavorable credit score.

- Make sure to pay bills on time. Setting up automatic payments or automated reminders can be an effective way to remember payment due dates.
- Pay down existing debt.

- Keep your credit card balances low.
- Avoid suddenly opening or closing existing credit accounts.

FSA's farm loan staff will guide you through the process, which may require you to reapply for a loan after improving or correcting your credit report.

For more information on FSA farm loan programs, visit www.fsa.usda.gov.
