Phoenix, Arizona 85003  
Phone: 602-285-6300

### **Filing CCC-941 Adjusted Gross Income (AGI) Certifications**

Many producers have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs) because they have not filed form CCC-

941, *Adjusted Gross Income Certification*. No program payment can be issued to an eligible producer, including landowners who share in the crop, without a valid CCC-941 on file in the county office.

Producers without a valid CCC-941 on file for the applicable crop year will not receive payments. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form.

FSA can accept the CCC-941 for 2015, 2016, 2017 and 2018. Unlike the past, producers must have the CCC-941 certifying their AGI compliance before any payments can be issued.

---

## Payment Limitations by Program

The 2014 Farm Bill established a maximum dollar amount for each program that can be received annually, directly or indirectly, by each person or legal entity. Payment limitations vary by program for 2014 through 2018.

Below is an overview of payment limitations by program.

**Commodity and Price Support Programs** The annual limitation for the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs, Loan Deficiency Payments (LDPs) and Market Loan Gains is \$125,000 total.

**Conservation Programs** The Conservation Reserve Program (CRP) annual rental payment and incentive payment is limited to \$50,000. CRP contracts approved before Oct. 1, 2008, may exceed the limitation, subject to payment limitation rules in effect on the date of contract approval.

The Emergency Conservation Program (ECP) has an annual limit of \$200,000 per disaster event. The Emergency Forest Restoration Program (EFRP) has an annual limit of \$500,000 per disaster event.

## Policy Updates for Acreage Reporting

The USDA Farm Service Agency (FSA) recently made several policy updates for acreage reporting for cover crops, revising intended use, late-filed provisions, grazing allotments as well as updated the definitions of "idle" and "fallow."

## Reporting Cover Crops:

FSA made changes to the types of cover crops. Cover crop types can be chosen from the following four categories:

- **Cereals and other grasses** - Any cover crop that is classified as a grass plant or cereal grain, and would include, but not be limited to, the following cover crops: cereal rye, wheat, barley, oats, black oats, triticale, annual ryegrass, pearl millet, foxtail millet (also called German, Italian or Hungarian millet), sorghum sudan grass, sorghum and other millets and grasses.
- **Legumes** - Any cover crop that is classified as a legume, including, but not limited to, clovers, vetches, peas, sun hemp, cowpeas, lentils and other legumes.
- **Brassicas and other broadleaves** - Any cover crop that is classified as a non-legume broadleaf, including, but not limited to, Brassicas such as radishes, turnips, canola, rapeseed, oilseed rape, and mustards, as well as other broadleaf plants such as phacelia, flax, sunflower, buckwheat, and safflower.
- **Mixtures** - Mixes of two or more cover crop species planted at the same time, for example, oats and radishes.
- If the cover crop is harvested for any use other than forage or grazing and is not terminated according to policy guidelines, then that crop will no longer be considered a cover crop and the acreage report must be revised to reflect the actual crop.

## Permitted Revision of Intended Use After Acreage Reporting Date:

New operators or owners who pick up a farm after the acreage reporting deadline has passed and the crop has already been reported on the farm, have 30 days to change the intended use. Producer share interest changes alone will not allow for revisions to intended use after the acreage reporting date. The revision must be performed by either the acreage reporting date or within 30 calendar days from the date when the new operator or owner acquired the lease on land, control of the land or ownership and new producer crop share interest in the previously reported crop acreage. Under this policy, appropriate documentation must be provided to the County Committee's satisfaction to determine that a legitimate operator or ownership and producer crop share interest change occurred to permit the revision.

## Acreage Reports:

In order to maintain program eligibility and benefits, producers must timely file acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may result in ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

## Reporting Grazing Allotments:

FSA offices can now accept acreage reports for grazing allotments. Producers will use form "FSA-578" to report grazing allotments as animal unit months (AUMs) using the "Reporting Unit" field. The local FSA office will need the grazing period start and end date and the percent of public land.

## Definitions of Terms:

FSA defines "idle" as cropland or a balance of cropland within a Common Land Unit (CLU) (field/subfield) which is not planted or considered not planted and does not meet the definition of

fallow or skip row. For example, the balance of a field that could not be planted due to moisture or a turn area that is not planted would be reported as idle.

Fallow is considered unplanted cropland acres which are part of a crop/fallow rotation where cultivated land that is normally planted is purposely kept out of production during a regular growing season. Resting the ground in this manner allows it to recover its fertility and conserve moisture for crop production in the next growing season.

### **Cover Crop Guidelines:**

Recently the Farm Service Agency (FSA), Natural Resources Conservation Service (NRCS) and Risk Management Agency (RMA) worked together to develop consistent, simple and a flexible policy for cover crop practices.

The termination and reporting guidelines were updated for cover crops.

### **Termination:**

The cover crop termination guidelines provide the timeline for terminating cover crops, are based on zones and apply to non-irrigated cropland. To view the zones and additional guidelines visit <https://www.nrcs.usda.gov/wps/portal/nrcs/main/national/landuse/crops/> and click "Cover Crop Termination Guidelines."

### **Reporting:**

The intended use of cover only will be used to report cover crops. This includes crops

that were terminated by tillage and reported with an intended use code of green manure. An FSA policy change will allow cover crops to be hayed and grazed. Program eligibility for the cover crop that is being hayed or grazed will be determined by each specific program.

If the crop reported as cover only is harvested for any use other than forage or grazing and is not terminated properly, then that crop will no longer be considered a cover crop.

Crops reported with an intended use of cover only will not count toward the total cropland on the farm. In these situations, a subsequent crop will be reported to account for all cropland on the farm.

Cover crops include grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage or cutting. A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

Cover crops can be planted: with no subsequent crop planted, before a subsequent crop, after prevented planting acreage, after a planted crop, or into a standing crop.

### **Double-Cropping:**

Each year, state committees will review and approve or disapprove county committee recommended changes or additions to specific combinations of crops.

Double-cropping is approved when the two specific crops have the capability to be planted and carried to maturity for the intended use, as reported by the producer, on the same acreage within a crop year under normal growing conditions. The specific combination of crops recommended by the county committee must be approved by the state committee.

Double-cropping is approved in Arizona on a county-by-county basis. Contact your local FSA Office for a list of approved double-cropping combinations for your county.

A crop following a cover crop terminated according to termination guidelines is approved double cropping and these combinations do not have to be approved by the state committee.

#### **Final Planting Dates:**

All producers are encouraged to contact their local FSA office for more information on the final planting date for specific crops. The final planting dates vary by crop, planting period and county so please contact your local FSA office for a list of county-specific planting deadlines. The timely planting of a crop, by the final planting date, may prevent loss of program benefits.

## **Preauthorized Debit Available for Farm Loan Borrowers**

USDA Farm Service Agency (FSA) has implemented pre-authorized debit (PAD) for Farm Loan Program (FLP) borrowers. PAD is a voluntary and alternative method for making weekly, bi-weekly, monthly, quarterly, semi-annual or annual payments on loans.

PAD payments are pre-authorized transactions that allow the National Financial and Accounting Operations Center (NFAOC) to electronically collect loan payments from a customer's account at a financial institution.

PAD may be useful for borrowers who use nonfarm income from regular wages or salary to make payments on loans or adjustment offers or for payments from seasonal produce stands. PAD can only be established for future payments.

To request PAD, customers, along with their financial institution, must fill out form RD 3550-28. This form has no expiration date, but a separate form RD 3550-28 must be completed for each loan to which payments are to be applied. A fillable form can be accessed on the USDA Rural Development (RD) website at <http://www.rd.usda.gov/publications/regulations-guidelines>. Click forms and search for "Form 3550-28."

If you have a "filter" on the account at your financial institution, you will need to provide the financial institution with the following information: Origination ID: 1220040804, Agency Name: USDA RD DCFO.

PAD is offered by FSA at no cost. Check with your financial institution to discuss any potential cost. Preauthorized debit has no expiration date, but you can cancel at any time by submitting a written request to your local FSA office. If a preauthorized debit agreement receives three payment rejections within a three-month period, the preauthorized debt agreement will be cancelled by FSA. The payment amount and due date of your loan is not affected by a cancellation of preauthorized debit. You are responsible to ensure your full payment is made by the due date.

For more information about PAD, contact your local FSA office. To find a local FSA office, visit <http://offices.usda.gov>

## Supervised Credit

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation's goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA's staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).

---

## Communication is Key in Lending

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be a success. A part of ensuring this success is providing guidance and counsel from the loan application process through the borrower's graduation to commercial lending institutions. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation;
- Any significant changes to family income or expenses;
- The development of problem situations;
- Any losses or proposed significant changes in security

In addition, if a farm loan borrower cannot make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, visit [www.fsa.usda.gov](http://www.fsa.usda.gov).
